

341 **CLASS V. SUPPLEMENTAL DESCRIPTORS**

342 **Table 7.** Summary table of data in RPSITE_SB_parasites_data.csv. Intestinal parasites from
 343 intestines of 182 raccoons in Santa Barbara County, California. Nematode counts include all
 344 individuals larger than 1 mm. Prevalence is given with Bayesian confidence intervals calculated
 345 using the “prevalence” package in R (Devleesschauwer et al., 2014; R Core Team, 2016).

346 †Includes infections that could not be identified to genus.
