

Supplementary information, Fig. S10

**Supplementary information, Fig. S10 | Interactions among the Y complexes.** **a**, The final coordinates of the inner and outer Y complexes are placed into the EM density map. Two views are shown. **b**, Interactions among the Y complexes within the same CR subunit and between two adjacent subunits. The inner and outer Y complexes interact with each other within the same subunit. A pair of Y complex from one subunit associate with its counterpart from the adjacent subunit in a head-to-tail fashion. **c**, A close-up view on the interface between the inner and outer Y complexes within the

same subunit. **d**, A close-up view on the interface between two neighboring CR subunits. Five areas of interactions are indicated by dashed oval circles.
