

Supplementary information, Fig. S7

Supplementary information, Fig. S7 | The EM density maps for the Nup358 complex. **a**, The EM density maps for the bridge domain (left panel) and selected α -helices from the bridge domain (right panel). **b**, Representative EM density maps for selected regions of the Nup358 complex. Shown here are the EM maps for the N-terminal helices of Clamp-1 and Clamp-2 and the U-domain from Clamp-1. All EM density maps in this figure were prepared using the masked Nup358-containing region map with a contour level between 15σ and 25σ .
