

eFigure 3. Kaplan-Meier Curves for Progression-Free Survival and Overall Survival by high TMB ≥ 7 mutations/Mb and *PTEN* alterations in Chemotherapy-Treated mTNBC. (A) Progression-free survival and (C) overall survival by tumor mutational burden <7 vs. ≥ 7 mutations/megabase; (B) Progression-free survival and (D) overall survival by *PTEN* alteration (absent vs. present). Abbreviations: mTNBC: metastatic triple-negative breast cancer; TMB: tumor mutational burden; WT: wild type.
