

**eFigure 4. Kaplan-Meier curves for progression-free and overall survival for high TMB  $\geq 10$  mutations/Mb in chemotherapy-treated mTNBC. (A) Progression-free survival and (B) overall survival by tumor mutational burden  $<10$  vs.  $\geq 10$  mutations/megabase. Abbreviations: mTNBC: metastatic triple-negative breast cancer; TMB: tumor mutational burden.**
