

Dermatology patient profile of PC+

appropriate

appropriate

All care that does not need hospital care and when in doubt, for example:

- Doubt about malignancy
- All general dermatology as well as biopsies and nitrogen treatment
- One demand for care!

inappropriate

inappropriate

- Evident treatment trajectory in hospital (day treatment / OK / laser therapy)
- Acute care
- Excisions
- Phlebology (varicose veins)
- Open wounds
- Second opinion
- Biopsies in the face
- Genital Warts
- Oedema
