Intracranial Pressure Monitoring Sites

**Stroke:
Every Minute Matters**

If you have a stroke, early treatment can help reduce damage to your brain and loss of physical and mental function.

- Stroke warning signs**
- Sudden numbness, weakness or paralysis of the face, arm or leg, usually on one side of the body
 - Sudden difficulty speaking or trouble understanding others
 - Sudden blurred or decreased vision, or sudden double vision
 - Sudden loss of balance or coordination
 - Sudden severe headache with no apparent cause
 - Sudden difficulty swallowing

- If you have any of these stroke warning signs:**
- Do not delay.
 - Call 911 or your designated emergency number right away.
 - Do not drive yourself to the emergency room.
