

Supplementary Figure S1. Mean faecal pH at 4 and 8 weeks (PP data set).

Supplementary Figure S2. Stool consistency (ITT data set).

Supplemental Table S1: CONSORT 2010 checklist of information to include when reporting a randomised trial*.

Section/Topic	Item No	Checklist item	Reported on page No
		Title and abstract	
	1a	Identification as a randomised trial in the title	1
	1b	Structured summary of trial design, methods, results, and conclusions (for specific guidance see CONSORT for abstracts)	1-2
		Introduction	
Background and objectives	2a	Scientific background and explanation of rationale	2
	2b	Specific objectives or hypotheses	2
		Methods	
Trial design	3a	Description of trial design (such as parallel, factorial) including allocation ratio	3
	3b	Important changes to methods after trial commencement (such as eligibility criteria), with reasons	N/A
Participants	4a	Eligibility criteria for participants	3
	4b	Settings and locations where the data were collected	3
Interventions	5	The interventions for each group with sufficient details to allow replication, including how and when they were actually administered	3-4
Outcomes	6a	Completely defined pre-specified primary and secondary outcome measures, including how and when they were assessed	4-5
	6b	Any changes to trial outcomes after the trial commenced, with reasons	N/A
Sample size	7a	How sample size was determined	6
	7b	When applicable, explanation of any interim analyses and stopping guidelines	N/A
Randomisation:			
Sequence generation	8a	Method used to generate the random allocation sequence	4
Allocation concealment mechanism	8b	Type of randomisation; details of any restriction (such as blocking and block size)	4
Implementation	9	Mechanism used to implement the random allocation sequence (such as sequentially numbered containers), describing any steps taken to conceal the sequence until interventions were assigned	4
Blinding	10	Who generated the random allocation sequence, who enrolled participants, and who assigned participants to interventions	4
	11a	If done, who was blinded after assignment to interventions (for example, participants, care providers, those assessing outcomes) and how	4
Statistical methods	11b	If relevant, description of the similarity of interventions	N/A
	12a	Statistical methods used to compare groups for primary and secondary outcomes	6-7
	12b	Methods for additional analyses, such as subgroup analyses and adjusted analyses	7
		Results	
Participant flow (a diagram is strongly recommended)	13a	For each group, the numbers of participants who were randomly assigned, received intended treatment, and were analysed for the primary outcome	7
	13b	For each group, losses and exclusions after randomisation, together with reasons	7
Recruitment	14a	Dates defining the periods of recruitment and follow-up	7
	14b	Why the trial ended or was stopped	N/A
Baseline data	15	A table showing baseline demographic and clinical characteristics for each group	8

Numbers analysed	16	For each group, number of participants (denominator) included in each analysis and whether the analysis was by original assigned groups	7-8
Outcomes and estimation	17a	For each primary and secondary outcome, results for each group, and the estimated effect size and its precision (such as 95% confidence interval)	8-16
	17b	For binary outcomes, presentation of both absolute and relative effect sizes is recommended	N/A
Ancillary analyses	18	Results of any other analyses performed, including subgroup analyses and adjusted analyses, distinguishing pre-specified from exploratory	N/A
Harms	19	All important harms or unintended effects in each group (for specific guidance see CONSORT for harms)	N/A
Discussion			
Limitations	20	Trial limitations, addressing sources of potential bias, imprecision, and, if relevant, multiplicity of analyses	18
Generalisability	21	Generalisability (external validity, applicability) of the trial findings	18-19
Interpretation	22	Interpretation consistent with results, balancing benefits and harms, and considering other relevant evidence	17-19
Other information			
Registration	23	Registration number and name of trial registry	3
Protocol	24	Where the full trial protocol can be accessed, if available	N/A
Funding	25	Sources of funding and other support (such as supply of drugs), role of funders	19

*We strongly recommend reading this statement in conjunction with the CONSORT 2010 Explanation and Elaboration for important clarifications on all the items. If relevant, we also recommend reading CONSORT extensions for cluster randomised trials, non-inferiority and equivalence trials, non-pharmacological treatments, herbal interventions, and pragmatic trials. Additional extensions are forthcoming: for those and for up to date references relevant to this checklist, see www.consort-statement.org.

Supplemental Table S2: Starter Formula (control formula-first month of trial).

Nutrients	per 100kcal	per litre
Energy (kcal)	100	650
Protein (g)	2.26	14.7
Total Fat (g)	5.61	36.5
Milk fat (g)	2.8	18.3
Lecithin (g)	2.8	18.3
Lactose (g)	10.12	65.9
Minerals (g)	0.38	2.5
Na (mg)	37	240
K (mg)	95	620
Cl (mg)	80	520
Ca (mg)	60	390
P (mg)	33	210
Mg (mg)	6.9	45
Mn (µg)	5	30
Se (µg)	4	26
Vitamin A (IU/µg RE)	380	2400
Vitamin D (IU/µg CE)	60	390
Vitamin E (IU/mg TE)	2	13
Vitamin K1 (µg)	8	52
Vitamin C (mg)	15	98
Vitamin B1 (mg)	0.07	0.45
Vitamin B2 (mg)	0.1	0.65
Niacin (mg)	0.5	3.3
Vitamin B6 (mg)	0.051	0.33
Folic acid (µg)	16	100
Pantothenic acid (mg)	0.7	4.6
Vitamin B12 ((µg)	0.2	1.3
Biotin (µg)	2	13
Choline (mg)	20	130
Inositol (mg)	25	160
Taurine (mg)	8.1	52
Carnitine (mg)	2	13
Fe (mg)	0.69	4.5
I (µg)	20	130
Cu (mg)	0.08	0.51
Zn (mg)	1.2	7.8
UMP (mg)	0.81	5.3
CMP (mg)	1.2	7.8
AMP (mg)	0.76	5
GMP (mg)	0.23	1.5

Standard Reconstitution clause 122 g + 900 mL water per litre; Scoop delivery weight 4.07 g Energy 30 scoops 650 kcal.
