Mobile App Rating Scale

Record ID	
Name of smartphone app	
Rating of this version of smartphone app	
Rating of all versions of smartphone app	
Developer	
Which version of the app is this?	
When was this app last updated?	
What is the cost of the basic version of the app?	
What is the cost of the upgraded version of the app?	(This can be 'in-app purchases' for an app that is free to download; or a separate 'paid/premium/pro' version of the app that must be paid for at download.)
What platform are you using this app on?	○ iPhone ○ Android
Please provide a brief description of this app - see its app store listing About section as a guide.	
Which app store search did you find this app in?	☐ Infant feeding ☐ Introducing solids ☐ Infant activity
What theoretical background or strategies does this app use?	☐ Assessment ☐ Feedback ☐ Information/education ☐ Monitoring/tracking ☐ Goal setting ☐ Advice/tips/strategies/skills training

₹EDCap

21/01/2019 15:34 projectredcap.org

Are there organisations or groups affiliated with this app?	 ☐ Unknown/do not know ☐ Commercial ☐ Government ☐ Non-government organisations ☐ University ☐ Does not have any affiliations
What are the technical aspects of this app?	 ☐ Allows sharing on social media (Facebook, Twitter, etc.) ☐ Has an app community ☐ Allows password protection ☐ Requires login ☐ Sends reminders ☐ Needs internet access to function
If there are other technical aspects of this app not covered, describe them here.	
are rated on a 5-point scale from "1. Inadequate" most accurately represents the quality of the app descriptors provided for each response category. The MARS is used to evaluate apps. Note - you may want to complete: - the "Website and app content based on 2012 Informs first to assess the app - this can help guide SECTION A: Engagement - fun, interesting, custom messages, reminders, feedback, enables sharing),	component you are rating. Please use the ant Feeding Guidelines" your Section D response. hisable, interactive (e.g. sends alerts, well-targeted to audience
1. Entertainment: Is the app fun/entertaining to use? Does it use any strategies to increase engagement through entertainment (e.g. through gamification)?	 1. Dull, not fun or entertaining at all 2. Mostly boring 3. OK, fun enough to entertain user for a brief time (< 5 minutes) 4. Moderately fun and entertaining, would entertain user for some time (5-10 minutes total) 5. Highly entertaining and fun, would stimulate repeat use
2. Interest: Is the app interesting to use? Does it use any strategies to increase engagement by presenting its content in an interesting way?	 1. Not interesting at all 2. Mostly uninteresting 3. OK, neither interesting nor uninteresting; would engage user for a brief time (< 5 minutes) 4. Moderately interesting; would engage user for some time (5-10 minutes total) 5. Very interesting, would engage user in repeat use

3. Customisation: Does it provide/retain all necessary settings/preferences for apps features (e.g. sound, content, notifications, etc.)?	 1. Does not allow any customisation or requires setting to be input every time 2. Allows insufficient customisation limiting functions 3. Allows basic customisation to function adequately 4. Allows numerous options for customisation 5. Allows complete tailoring to the individual's characteristics/preferences, retains all settings
4. Interactivity: Does it allow user input, provide feedback, contain prompts (reminders, sharing options to social media/through email or Bluetooth, notifications, etc.)? Note: these functions need to be customisable and not overwhelming in order to be perfect.	 1. No interactive features and/or no response to user interaction 2. Insufficient interactivity, or feedback, or user input options, limiting functions 3. Basic interactive features to function adequately 4. Offers a variety of interactive features/feedback/user input options 5. Very high level of responsiveness through interactive features/feedback/user input options
5. Target group: Is the app content (visual information, language, design) appropriate for your target audience?	 1. Completely inappropriate/unclear/confusing 2. Mostly inappropriate/unclear/confusing 3. Acceptable but not targeted. May be inappropriate/unclear/confusing 4. Well-targeted, with negligible issues 5. Perfectly targeted, no issues found
Admin only: Mean Engagement score. SECTION B: Functionality - app functioning, easy to	o learn, navigation, flow logic, and gestural
design of app	
6. Performance: How accurately/fast do the app features (functions) and components (buttons/menus) work?	 1. App is broken; no/insufficient/inaccurate response (e.g. crashes/bugs/broken features, etc.) 2. Some functions work, but lagging or contains major technical problems 3. App works overall. Some technical problems need fixing/slow at times 4. Mostly functional with minor/negligible problems 5. Perfect/timely response; no technical bugs found/contains a 'loading time left' indicator
7. Ease of use: How easy is it to learn how to use the app; how clear are the menu labels/icons and instructions? E.g. are the functions of the app intuitive and do they operate as expected?	 1. No/limited instructions; menu labels/icons are confusing; complicated 2. Useable after a lot of time/effort 3. Useable after some time/effort 4. Easy to learn how to use the app (or has clear instructions) 5. Able to use app immediately; intuitive; simple

8. Navigation: Is moving between screens logical/accurate/appropriate/uninterrupted; are all necessary screen links present? E.g. navigation between screens should be able to be reached in as few actions as possible - from the main page of the subsection (e.g. a new record section, or result section), it should not take more than three navigational actions to reach a page. Navigation should also be logical, intuitive and clearly indicated, with signs obvious and not obscured.	 1. Different sections within the app seem logically disconnected and random/confusing/navigation is difficult 2. Usable after a lot of time/effort 3. Usable after some time/effort 4. Easy to use or missing a negligible link 5. Perfectly logical, easy, clear and intuitive screen flow throughout, or offers shortcuts
9. Gestural design: Are interactions (taps/swipes/pinches/scrolls) consistent and intuitive across all components/screens? E.g. interactive items should be stylistically indicated as being able to be tapped, swiped, pinched or scrolled.	 1. Completely inconsistent/confusing 2. Often inconsistent/confusing 3. OK with some inconsistencies/confusing elements 4. Mostly consistent/intuitive with negligible problems 5. Perfectly consistent and intuitive
Admin only: Mean Functionality score. SECTION C: Aesthetics - graphic design, overall visu consistency	al appeal, colour scheme, and stylistic
10. Layout: Is arrangement and size of buttons/icons/menus/content on the screen appropriate or zoomable if needed?	 1. Very bad design, cluttered, some options impossible to select/locate/see/read device display not optimised 2. Bad design, random, unclear, some options difficult to select/locate/see/read 3. Satisfactory, few problems with selecting/locating/seeing/reading items or with minor screen size problems 4. Mostly clear, able to select/locate/see/read items 5. Professional, simple, clear, orderly, logically organised, device display optimised. Every design component has a purpose
11. Graphics: How high is the quality/resolution of graphics used for buttons/icons/menus/content?	 1. Graphics appear amateur, very poor visual design - disproportionate, completely stylistically inconsistent 2. Low quality/low resolution graphics; low quality visual design - disproportionate, stylistically inconsistent 3. Moderate quality graphics and visual design (generally consistent in style) 4. High quality/resolution graphics and visual design - mostly proportionate, stylistically consistent 5. Very high quality/resolution graphics and visual design - proportionate, stylistically consistent throughout

12. Visual appeal: How good does the app look? Consider: - consistent colour scheme - visually accessible colour choices (easy to read with normal or corrected vision) - legible font sizes, consistent font themes (1-2 fonts used logically, not different fonts used inconsistently) Admin only: Mean Aesthetics score.	 1. No visual appeal, unpleasant to look at, poorly designed, clashing/mismatched colours 2. Little visual appeal - poorly designed, bad use of colour, visually boring 3. Some visual appeal - average, neither pleasant, nor unpleasant 4. High level of visual appeal - seamless graphics - consistent and professionally designed 5. As above + very attractive, memorable, stands out; use of colour enhances app features/menus
SECTION D: Information - Contains high quality in references) from a credible source. Select N/A if	
13. Accuracy of app description (in app store): Does app contain what is described in its About section?	 1. Misleading. App does not contain the described components/functions. Or has no description 2. Inaccurate. App contains very few of the described components/functions 3. OK. App contains some of the described components/functions 4. Accurate. App contains most of the described components/functions 5. Highly accurate description of the app components/functions
14. Goals: Does app have specific, measurable and achievable goals (specified in app store description or within the app itself)?	 N/A. Description does not list goals, or app goals are irrelevant to research goal (e.g. using a game for educational purposes) 1. App has no chance of achieving its stated goals 2. Description lists some goals, but app has very little chance of achieving them 3. OK. App has clear goals, which may be achievable. 4. App has clearly specified goals, which are measurable and achievable 5. App has specific and measurable goals, which are highly likely to be achieved
15. Quality of information: Is app content correct, well written, and relevant to the goal/topic of the app?	 N/A. There is no information within the app 1. Irrelevant/inappropriate/incoherent/incorrect 2. Poor. Barely relevant/appropriate/coherent/may
Note: refer to your overall score for this app on the "Suitability Assessment of Material" form. Suggestion: For "70-100%, superior material" ratings, score 4 or 5 here. For "40-69%, adequate material" ratings, score 3 or 4 here. For "0-39%, not suitable material" ratings, score 1 or 2 here.	be incorrect 3. Moderately relevant/appropriate/coherent/and appears correct 4. Relevant/appropriate/coherent/correct 5. Highly relevant, appropriate, coherent, and correct

16. Quantity of information: Is the extent coverage within the scope of the app; and comprehensive but concise?

Note: refer to your overall score for this app on the "Website and app content based on 2012 Infant Feeding Guidelines" form.

Suggestion:

For "≥90%, excellent" ratings, score 5 here. For "75-89%, adequate" ratings, score 3 or 4 here. For "≤74%, poor" ratings, score 1 or 2 here.

- N/A. There is no information within the app
- 1. Minimal or overwhelming
- 2. Insufficient or possibly overwhelming
- 3. OK but not comprehensive or concise
- 4. Offers a broad range of information, has some gaps or unnecessary detail; or has no links to more information and resources
- 5. Comprehensive and concise; contains links to more information and resources
- 17. Visual information: Is visual explanation of concepts through charts/graphs/images/videos, etc.
- clear, logical, correct?

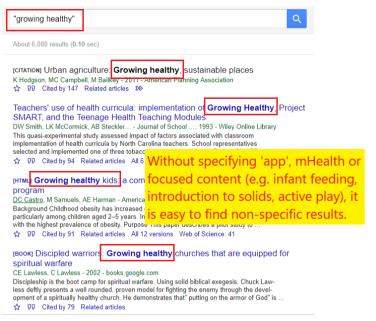

- N/A. There is no visual information within the app (e.g. it only contains audio, or text)
- 1. Completely unclear/confusing/wrong or necessary but missing
- 2. Mostly unclear/confusing/wrong
- 3. OK but often unclear/confusing/wrong
- 4. Mostly clear/logical/correct with negligible issues
- 5. Perfectly clear/logical/correct

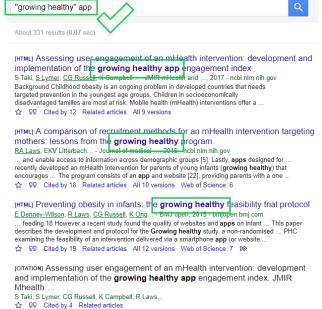

18. Credibility: Does the app come from a legitimate source (specified in app store description or within the app itself)?

Note: legitimacy of the source will include professional input - e.g. from a clinician, nutritionist, dietitian, nurse, midwife, paediatrician, lactation consultant, physiotherapist, occupational therapist or physician

- 1. Source identified but legitimacy/trustworthiness of source is questionable (e.g. commercial business with vested interest)
- 2. Appears to come from a legitimate source, but it cannot be verified (e.g. has no webpage)
- 3. Developed by small NGO/institution (hospital/centre, etc.) /specialised commercial business, funding body
- 4. Developed by government, university or as above but larger in scale
- 5. Developed using nationally competitive government or research funding (e.g. Australian Research Council, NHMRC)

An example of searching specifically for smartphone apps or mHealth topics is attached.

21/01/2019 15:34

19. Evidence base: Has the app been trialled/tested; must be verified by evidence (in published scientific literature)? Note: to check if this app has been published in scientific literature, search for the name of the app in Google Scholar.	 N/A. The app has not been trialled/tested 1. The evidence suggests the app does not work 2. App has been trialled (e.g., acceptability, usability, satisfaction ratings) and has partially positive outcomes in studies that are not randomised controlled trials (RCTs), or there is little or no contradictory evidence. 3. App has been trialled (e.g., acceptability, usability, satisfaction ratings) and has positive outcomes in studies that are not RCTs, and there is no contradictory evidence. 4. App has been trialled and outcome tested in 1-2 RCTs indicating positive results 5. App has been trialled and outcome tested in >3 high quality RCTs indicating positive results
Admin only: Sum of Information scores (will not include N/A scores).	
Admin only: Possible points for Section D (does not include N/A scores).	
Admin only: Mean Information score.	
SECTION E: App subjective quality	
20. Would you recommend this app to people who might benefit from it?	 1. Not at all - I would not recommend this app to anyone 2. There are very few people I would recommend this app to 3. Maybe - There are several people whom I would recommend it to 4. There are many people I would recommend this app to 5. Definitely - I would recommend this app to everyone
21. How many times do you think you would use this app in the next 12 months if it was relevant to you?	 ○ 1. None ○ 2. 1-2 ○ 3. 3-10 ○ 4. 10-50 ○ 5. >50
22. Would you pay for this app?	○ 1. No○ 3. Maybe○ 5. Yes
23. What is your overall star rating of the app?	* One of the worst apps I've used ** *** Average **** **** One of the best apps I've used

REVIEWER-DESIGNED SUBSCALE: Accessibility	
24. Is the app available in other languages?	○ No ○ Yes
25. Can data be easily inputted into this app, reducing or avoiding the need for user to use both hands?	○ No○ Yes○ Not applicable
26. Does the application provide a help or user guide?	○ No○ Yes○ Not applicable
Check your response to Q7.	
27. Does the application provide a way of contacting the developers for support?	○ No or not found○ Yes
Note: you should be able to do this as part of the app, without going back to the App Store or Google Play listing.	
Admin only: Sum of Accessibility (subscale) score.	
Admin only: Possible points for Accessibility subscale (does not include N/A scores).	
Admin only: Mean Accessibility (subscale) score.	
REVIEWER-DESIGNED SUBSCALE: Security	
28. User data should be kept private and safe - is the data inputted into the app encrypted in the event of loss or system malfunction?	○ No or not found○ Yes○ Not applicable
29. Can information be backed up or restored, in case of device malfunction, data loss or deletion of app?	○ No or not found○ Yes○ Not applicable
30. Does the app developer/publisher clearly state the privacy policy regarding how confidential, private or semi-private information will be treated?	○ No or not found○ Yes○ Not applicable
Admin only: Sum of Security (subscale) score.	
Admin only: Possible points for Security subscale (does not include N/A scores).	
Admin only: Mean Security (subscale) score.	

SCORING		
Admin only: App subjective quality mean score		
Admin only: modified MARS app quality mean score		
Mean of sections A, B, C, D, Accessibility subscale, Security subscale		
Admin only: MARS app quality mean score		
Mean of sections A, B, C, D only		
Is the MARS app quality score (mean of sections A to D) the same as the modified MARS app quality score (mean of sections A to D, Accessibility subscale, Security subscale)?	○ No ○ Yes	

App content based on 2012 Infant Feeding Guidelines

Record ID				
necolu ib				
Topics were identified using the National Health and Medical Research Council's Infant Feeding Guidelines (2012), the Department of Health and Ageing's National Physical Activity Recommendations for Children 0-5 Years (2010) and primary literature. These were used to determine adequate coverage of the relevant material and the scientific accuracy of this information on apps. Please select answers based on the focus of the smartphone app (i.e. infant feeding, introducing solids or infant activity) and select N/A for the other sections that are not applicable.				
Name of smartphone app				
Which app store search did you fin	nd this app in?	☐ Infant fe ☐ Introduc ☐ Infant ac	ing solids	
What platform are you using this a	app on?	○ iPhone ○ Android		
Is the revision/last update date for this app recent enough to account for changes in the field? No or no last update date given Yes				
i.e. is the revision/last update date after the publication of the NHMRC Infant Feeding Guidelines in 2012 or the National Physical Activity Recommendations for Children 0-5 years olds in 2010?				
COVERAGE of infant feeding	content in apps
