

supplementary Figure 5

Supplementary Figure 5

K7 positive cells (presumptive intermediate PECs) within FSGS lesions

A. Examples of a tip lesion with little keratin 7 (K7) expression (arrow heads). **B.** Example of a lesion not otherwise specified (NOS) containing a mixture of K7 positive (arrow heads) or negative (arrows) adhesions/lesions. Immunofluorescent co-stainings for the global PEC marker ANXA3 and K7. Scale bar 100 μm .
