

Fig.S7 (A) Representative images of hematoxylin and eosin (HE) and immunohistochemical staining. Higher expression of RPS6 and pRPS6 (Ser235/236) were detected in GBM than pilocytic astrocytoma (PA). (B) In western blotting, expression of pRPS6 (Ser235/236) in GBM was higher than that in PA. (scale bar, 100 μm)
