Figure S4: Direct interaction of drugs between CPM and TRD with A $\beta$ (1-40) peptides in a 1:1 ratio. (A) TEM image of A $\beta$ (1-40) peptide control grown for 60 h at 37°C under continuous shaking (B) TEM image of A $\beta$ (1-40) control grown in the presence of CPM (1:1 ratio) for 60 h at 37°C under continuous shaking. (C) TEM image of A $\beta$ (1-40) control grown in the presence of TRD (1:1 ratio) for 60 h at 37°C under continuous shaking.
