Supplementary Figure 3

no. of nodes in the main network (& secondary networks)		nteractors fied in this study	random selection 27 (3)
no. of nodes with x connections	30 - No. of nodes 10 - 0	2 3 4 5 6 No. of conf	APC interactors random selection 7 8 9 10 15 nections
no. of nodes with >1 connection	26		10
no. of nodes directly connected to previously identified interactors	9		5

Supplementary Figure 3. A Network integrating known APC binding partners (blue), random selection (orange), and indirect interactors (grey). B Degree of integration into a network of known APC interactors between APC-binding proteins identified here, and the random selection in A.
