

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: SiRNA sequences used in this study.

File Name: Supplementary Movie 1

Description: Video for Fig. 6a.

File Name: Supplementary Movie 2

Description: Video for Supplementary Fig. 10.

File Name: Supplementary Movie 3

Description: Video for Fig. 6b–e and Supplementary Fig. 11. Individual GFP-CTIF signals in the mUPF1-depleted cells were not as bright as those in the undepleted or mUPF2-depleted cells. To better visualize GFP-CTIF movements, we enhanced the contrast of images of the mUPF1-depleted cell, resulting in a much larger aggresome as depicted in the movie.
