

**S2 Fig. MES<sub>5500</sub> reduces spleen size and inflammation in ConA-treated mice.**

(A) Schematic diagram of *in vivo* MES treatment. (B) Image of multifunction generator. (C) BALB/c mice were treated with MES<sub>5500</sub> for 20 min, and injected with ConA (i.v.; 1 mg/kg). Mice were treated again with MES<sub>5500</sub>. Four hr later, mice were euthanized, and spleen was collected. Mouse spleen sizes are shown.
