

Figure S1. (A) miR-NC and miR-497-5p mimics were transferred into KYSE-30 cells respectively, and the expression of miR-497-5p in KYSE-30 cells was detected by RT-qPCR. (B) miR-NC and miR-497-5p inhibitors were transfected into KYSE-30 cells respectively, and the expression of miR-497-5p in KYSE-30 cells was detected by RT-qPCR. *** $P < 0.001$ vs. miR-NC.

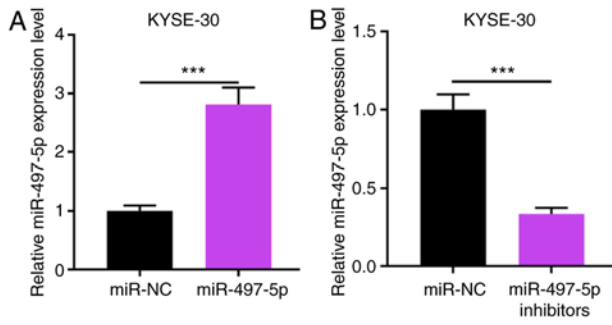

Figure S2. (A) miR-NC and miR-497-5p mimics were transferred into TE-5 cells respectively, and the expression of miR-497-5p in TE-5 cells was detected by RT-qPCR. (B) miR-NC and miR-497-5p inhibitors were transfected into TE-5 cells respectively, and the expression of miR-497-5p in TE-5 cells was detected by RT-qPCR. ***P<0.001 vs. miR-NC.
