

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Coordinates for matches and possible annotation for all mock spacers with ≥ 5 matches in self genome.

File Name: Supplementary Data 2

Description: Characteristics of self-matching spacers in genomes containing ≥ 5 self-matches.

File Name: Supplementary Data 3

Description: Coordinates for matches and possible annotation for all 22-mers from mock spacers with matches in viral genomes

File Name: Supplementary Data 4

Description: Numbers of different PAMs for protospacers found in in adaptation experiments for self and viral matches.
