

Additional file 2: Text S1. Estimation of gametic phase from multi-locus diploid data based on a Gibbs sampling strategy.

Number of individuals : 814
Number of ambiguous individuals : 182
Number of loci : 3
Number of polymorphic loci : 3

List of estimated haplotype frequencies

[Hapl. ID]	Hapl. freq.	Haplotype definition
=====	=====	=====
[1]	287 (0.176)	S V F
[2]	844 (0.518)	S V C
[3]	257 (0.158)	S V L
[4]	240 (0.147)	P G F
