

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Training and validation dataset for “Supplementary Software 1.zip”

File Name : Supplementary Data 2

Description: Embeddings of the images of the 24 bones, as generated by the fully trained Triplet network. Underlying data for the plots in Figure 5.

File Name: Supplementary Software 1

Description: Custom software to pre-process data, train neural networks and classifiers, and to classify images.

File Name: Supplementary Software 2

Description: Pre-trained Triplet neural network and kNN classifier. These files are created as the result of the training process when using the scripts in “Supplementary Software 1.zip”.
