

S1 Fig. Amyloid deposition by Congo red staining.

The amount of Congo red-positive deposition was scored in five grades 1 - 5, from minimal to severe (A, C, E). The staining was well visualized under the FITC filter of a BZ-X710 all-in-one fluorescent microscope (B, D, F). Grade 2 (A and B), Grade 3 (C and D), and Grade 5 (E and F). Scale bars, 200 μ m
