

-  Primary arterial branches
-  Secondary arterial branches
-  Tertiary arterial branches

Figure S4. Expression of Trangelin1 in vascular mural cells. Retinal flat mounts of middle-aged (18 months old) wild type and *pdx1*^{-/-} zebrafish stained for Trangelin1 expression (red). Primary arterial branches, secondary arterial branches and tertiary arterial branches are outlined with dashed lines in different colors as indicated. Size bars indicate 50 μ m.
