

Fig. S1. Phenotypes of *IAMT1ox2* plants.

A) Phenotypes of *IAMT1ox2* plants. Plants were treated with mock or ER (2 μ M) for 4 days. Scale bars = 1 cm. B) Primary root length of *IAMT1ox2* plants. Plants were treated with mock or ER for 5 days. Differences between mock- and ER-treated plants are statistically significant at $P < 0.05$ (** $P < 0.001$, Student's t -test).
