

Figure S4

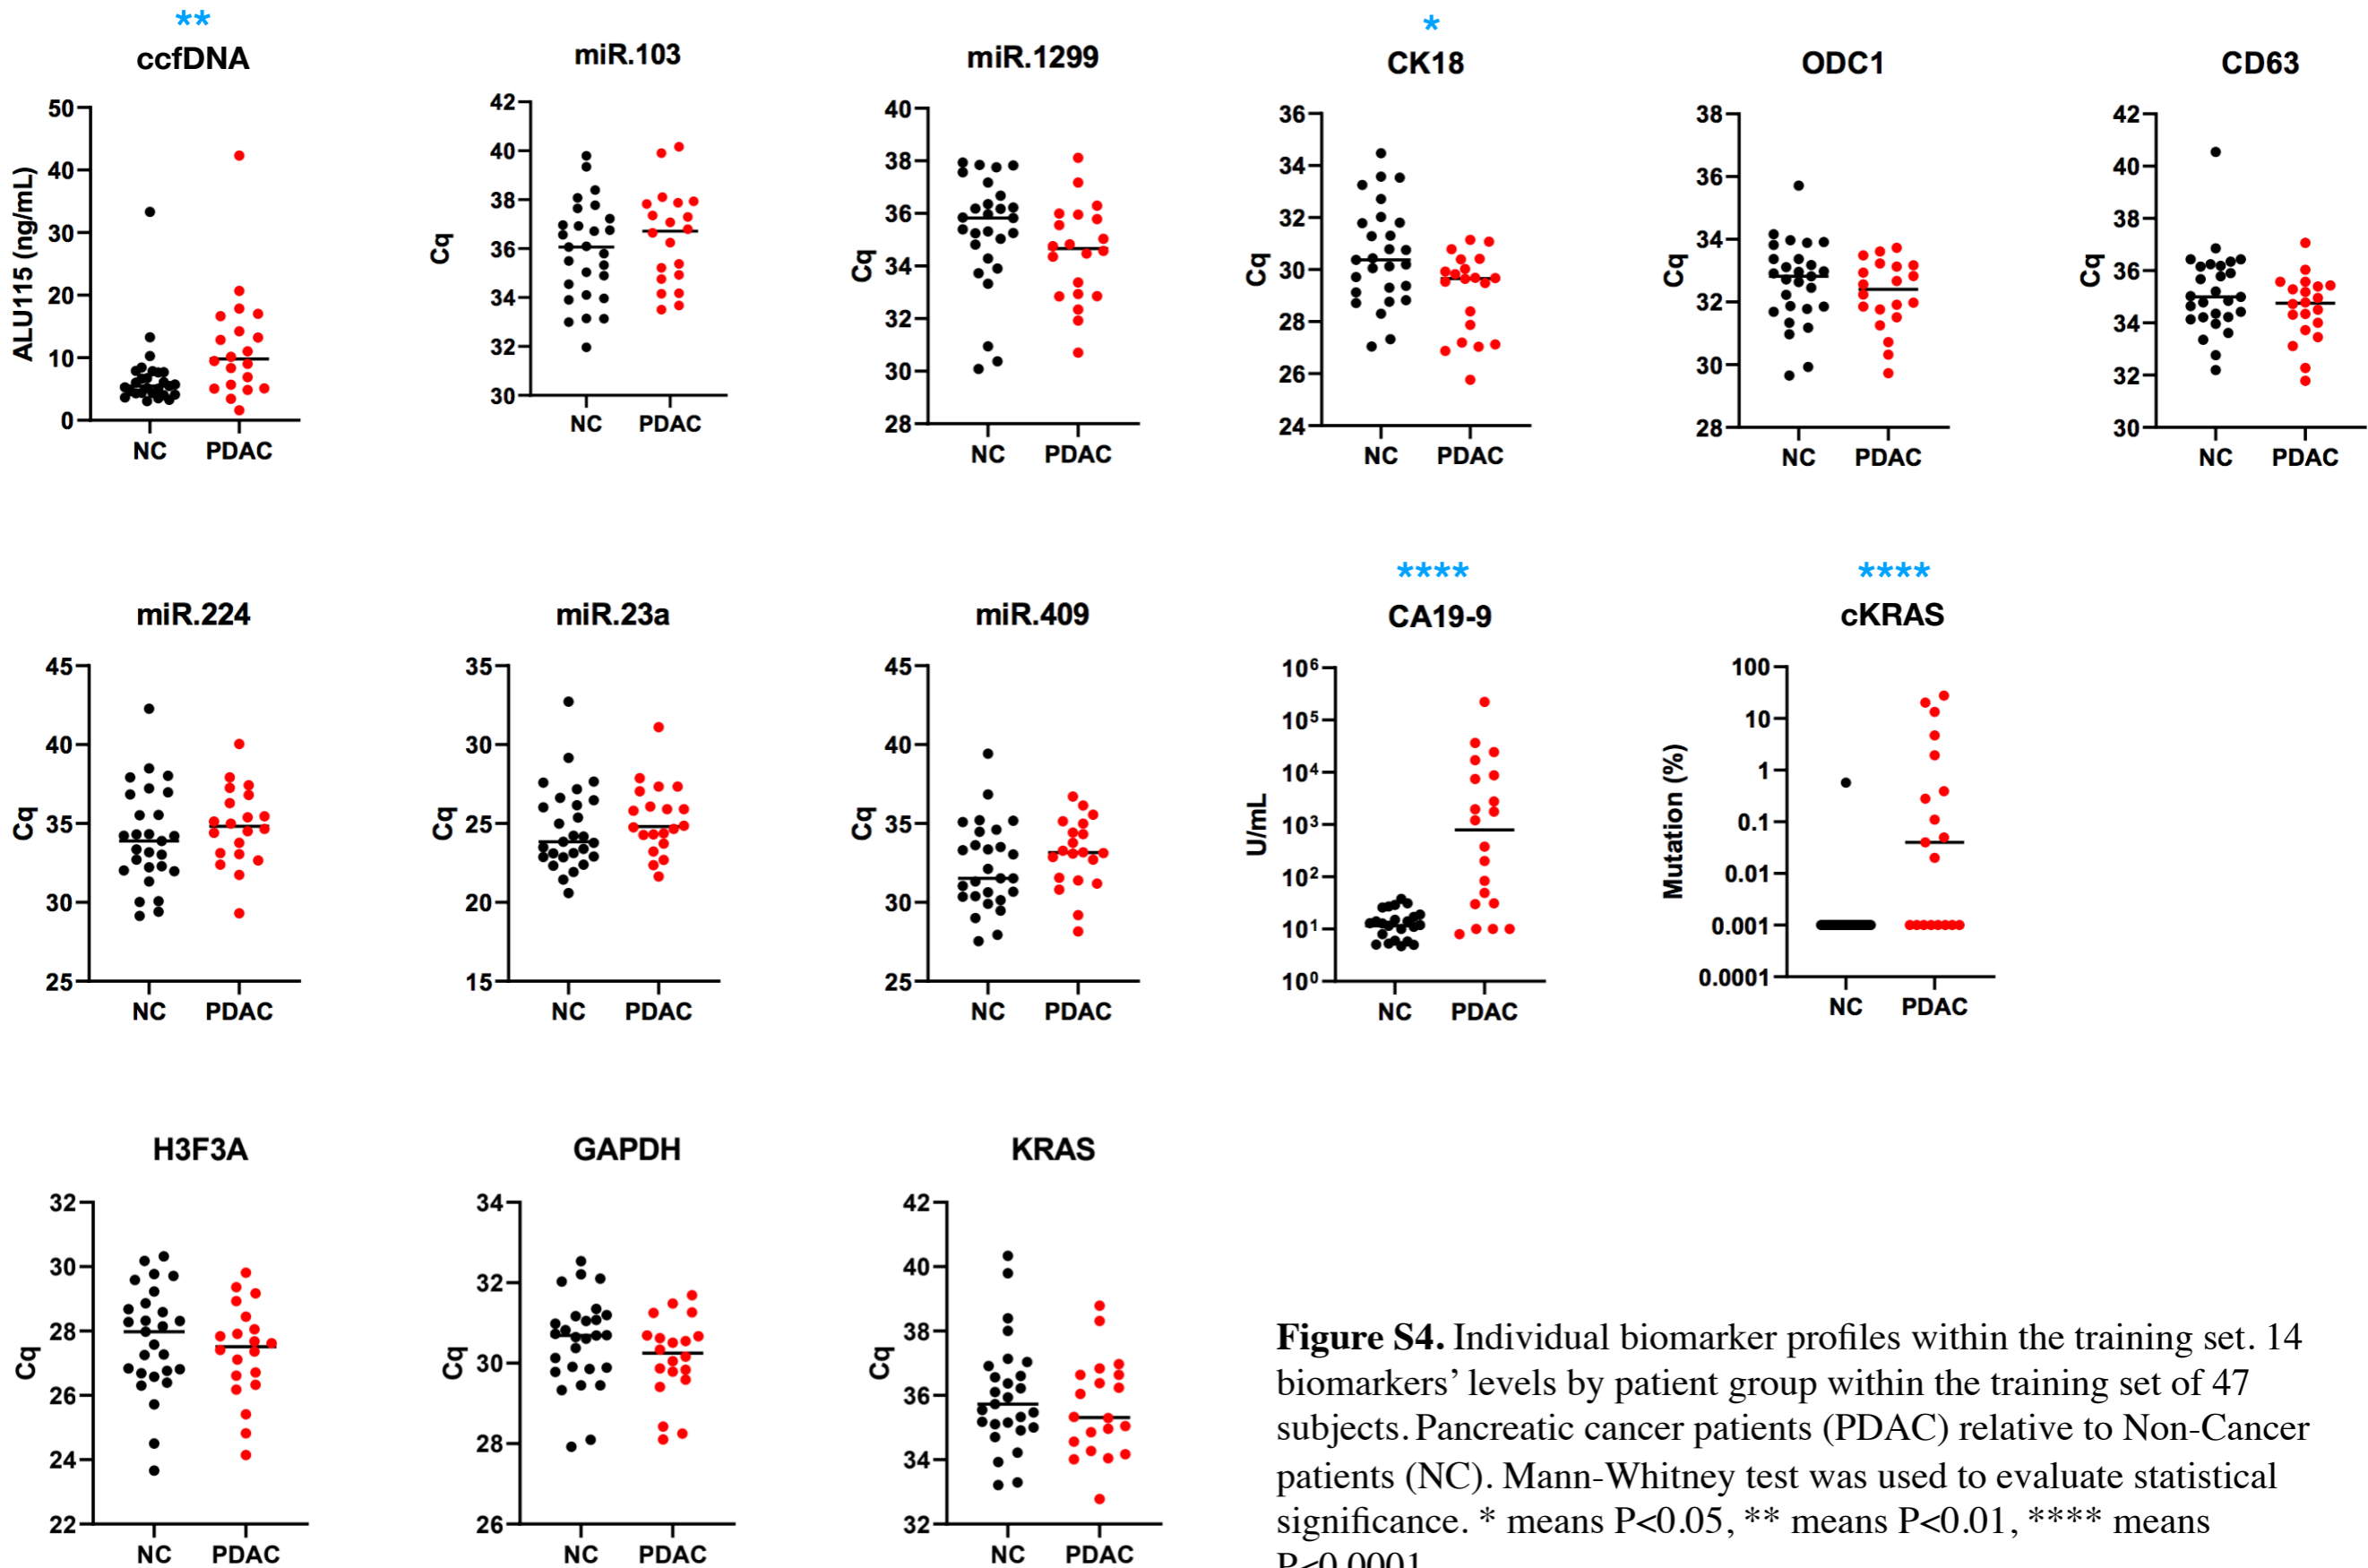

Figure S4. Individual biomarker profiles within the training set. 14 biomarkers' levels by patient group within the training set of 47 subjects. Pancreatic cancer patients (PDAC) relative to Non-Cancer patients (NC). Mann-Whitney test was used to evaluate statistical significance. * means $P < 0.05$, ** means $P < 0.01$, **** means $P < 0.0001$.
