

Region comparability score

Score	Relationship types		Criteria
0	Non-overlapping		The regions are non-overlapping
1	Overlapping		The regions have very little of their respective areas shared (<20%) <i>and</i> precise area of overlap hard to define
2			The regions have very little of respective areas shared (<20%) <i>or</i> precise area of overlap hard to define
3			Regions sharing more than approximately 20% of their respective areas, with non-overlapping parts easily defined
4	Overlapping	Part of Includes	Overlapping regions that share more than approximately 40% of their respective areas, with non-overlapping parts easily defined Part-of / includes relationships with very low coverage (>20%)
5			Overlapping regions that share more than approximately 60%, with non-overlapping parts easily defined Part of / includes relationships with approximately 25% coverage
6			Overlapping areas that share more than 80% of their respective areas Part of / includes relationship with approximately 50% coverage
7	Part of / includes		Part of / includes relationships with more than approximately 70% coverage
8	Identical		Small, non-overlapping regions (>20%)
9			Small, non-overlapping regions (>10%)
10			No visible regions of non-overlap
