Reminder of invitation to participate in the SPHERE-C survey

Dear Mr. /Ms. [first name, last name]

This is a gentle reminder and follow-up to the previous letter inviting you to participate in a survey, which will study the prevalence of hepatitis C in Stara Zagora. As participant you will be offered free hepatitis C testing and will get to know your status, so that if positive, you can get access to the needed medical care. Further, we will offer a small gift as a token of our appreciation for your participation.

With your help, we will be able to provide an estimate of the hepatitis C prevalence in Stara Zagora, Bulgaria, which will be used for further public health planning.

You were randomly selected from the local population register in Stara Zagora to represent the adult population (18 years and older) in Stara Zagora.

When taking part in the survey, you will be asked to complete a short questionnaire after which a blood sample will be collected. It takes around 30-40 minutes in total to take part in the survey.

The success of the survey requires a high participation rate. Your participation is therefore very important, also if you are already aware of your hepatitis C status. Your participation cannot be replaced by someone else. Your participation is voluntary. All information collected during the survey, will be handled confidentially. You can find answers to questions regarding the survey in the enclosed information leaflet.
