Original Image taken on iBright FL1000 gel image for AlexaFluor 647 (inverted to B+W).  
 16.5% Bis-Tris acrylamide gel  
 Each visible band N-terminally labeled AlexaFluor 647 ubiquitin alone (bottom band) or in covalent complex with E1, E2, or E6AP protein.

Components in each lane are as indicated above lanes and described in the text.
