

## Supplemental figure

### Tubules (GSE30529)

### Glomeruli (GSE30528)

**Fig. 1.** Differently expressed nAChR in DKD tubules and glomeruli compared with healthy controls. Analysis of nAChR gene expression in Gene Expression Omnibus database (GSE30528 and GSE30529), previously reported in diabetes. CHRNA, acetylcholine receptor subunit alpha; CHRNB, acetylcholine receptor subunit beta; CHRNG, acetylcholine receptor subunit gamma; CHRND, acetylcholine receptor subunit delta; CHRNE, acetylcholine receptor subunit epsilon.
