Patient Chief Complaint

Was POCUS indicated?

- Yes - in my clinical practice POCUS is likely to add critical information that will change clinical management or disposition
- No - in my clinical practice POCUS is unlikely to add critical information that will change clinical management or disposition
- Maybe - in my clinical practice POCUS could add critical information that will change management or disposition

Why?

Attending Survey

Which application(s)?

- Cardiac
- Lung
- IVC
- Aorta
- Abdominal Fluid
- Gallbladder
- DVT
- Soft Tissue
- MSK
- Pelvic
- Other

Other:

At the time of patient discussion, did the PGY-4 think POCUS was indicated?

- Yes, without prompting
- Yes, but needed prompting
- No

Was timely* POCUS performed? (*timely defined as done within a time frame able to effect critical management or dispo decisions)

- Yes
- Yes - but not by the PGY-4
- No

Did the PGY-4 correctly interpret the findings?

- Yes
- No
- PGY-4 did not review scans
- Required some prompting

Did the PGY-4 incorporate the findings into patient care?

- Yes
- No
- Required some prompting

Did the PGY-4 correctly incorporate findings into patient care?

- Yes
- No
- Required some prompting

Why not?

- Lack of required views
- Poor image quality
- Incorrect image interpretation
- Lack of understanding of clinical application
- Unsure
- Other

Other:

Is this PGY-4 competent to use POCUS to diagnose and manage critically ill patients in the Emergency Department?

- Not entrustable, cannot perform without complete assistance
- Pre-entrustable, requires some assistance
- Entrustable, can perform independently
