

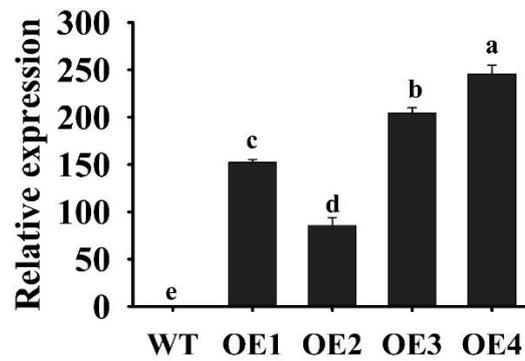

**Figure S1.** Differential expression of *HuERF1* in various tissues (root, stem, petal, calyx and squama). Bars with different letters indicate significant difference at  $p < 0.05$ . Mean values and SDs at least for three biological replicates are shown.

**Figure S2.** Differential expression of *HuERF1* in *HuERF1* overexpressing transgenic *Arabidopsis* lines and WT. Bars with different letters indicate significant difference at  $p < 0.05$ . Mean values and SDs at least for three biological replicates are shown.
