

Supplementary Table 3. Comparison of bleeding in different age groups

Bleeding	60~69	70~79	≥80	χ^2	<i>P</i>
Yes, n (%)	5 (3.7)	9 (8.3)	11 (19.6) *	13.053	0.001
No, n (%)	129 (96.3)	100 (91.7)	45 (80.4)		

The * represents a statistically significant difference compared to the 60~69 years old group (P<0.016)
