

Additional file 6: Figure S6. Comparison of log-score values according to number of spots per sample. Analysis was performed using *Ae. aegypti* from the field ($n = 29$) which were compared with MSPs in the database. The red dashed line marks the threshold value of 1.8. Wilcoxon test, $**P < 0.01$. Abbreviations: NS, not significant; LSVs, log-score values.
