

**Table S1: Probability values and adjusted FDR (q-values) values for the 50 most abundant bacterial and fungal OTUs for Location effect, Tolerance effect and the interaction (L\*T) between the two effects. Cells shaded grey are statistically significantly ( $q < 0.05$ ) different for the specific effect**

Method	OTU	Location	P-value	q-values		Tolerance	P-value	q-values		Interaction	P-value	q-values
