

SUPPLEMENTARY FIGURE 1

Please rank the following attributes from **1 (most important)** to **9 (least important)** in influencing your decisions to prescribe a health-app to patients

Attribute	Ranking (1 most important, 9 least important)
The app has an NHS stamp of approval, CE mark or other indicator of quality assessment	
There are published studies demonstrating the safety/effectiveness of the app	
The cost of the app	
Having access to appropriate IT for app testing/demonstrating (including internet, devices)	
You have used/checked the app yourself	
The app has been created by a clinician/health professional or clinical body	
The app is easy to prescribe (It is listed in EMIS/System One)	
The app has been recommended by other clinicians/royal college/clinical network	
Unmet need in the condition the app is designed to treat (e.g. long waiting lists with mental health, lack of follow-up care)
