

Supplementary figure 3

Supplementary figure 3. Surface marker analysis of Apc^{Min/+} MDSCs and MC38 MDSCs. Representative flow cytometry plots of MDSC subsets from Apc^{Min/+} mice (**A**) and from MC38 tumor bearing mice showing expression of antigen presenting molecules including MHC class I and II; costimulatory molecules CD80, CD86, and CD40; IL-4R α ; and macrophage markers CSF-1R and F4/80. Similarly, DCs from Apc^{Min/+} and MC38 tumor bearing mice were analyzed. Dotted lines indicate isotype controls.
