

Supplementary File 4.

Supplementary Table 4. The significance of potential sources of heterogeneity tested by meta-regression.

Test factor	Cardiovascular disease	Hypertension	Cardiac injury
	P value		
Study design	0.561	0.592	0.544
Sample size	0.563	0.116	0.421
Mean age	0.165	0.124	0.141
Male proportion	0.230	0.072	0.577
