

Fig. S1. ISCU knockdown induces mitophagy, which is independent on Parkin

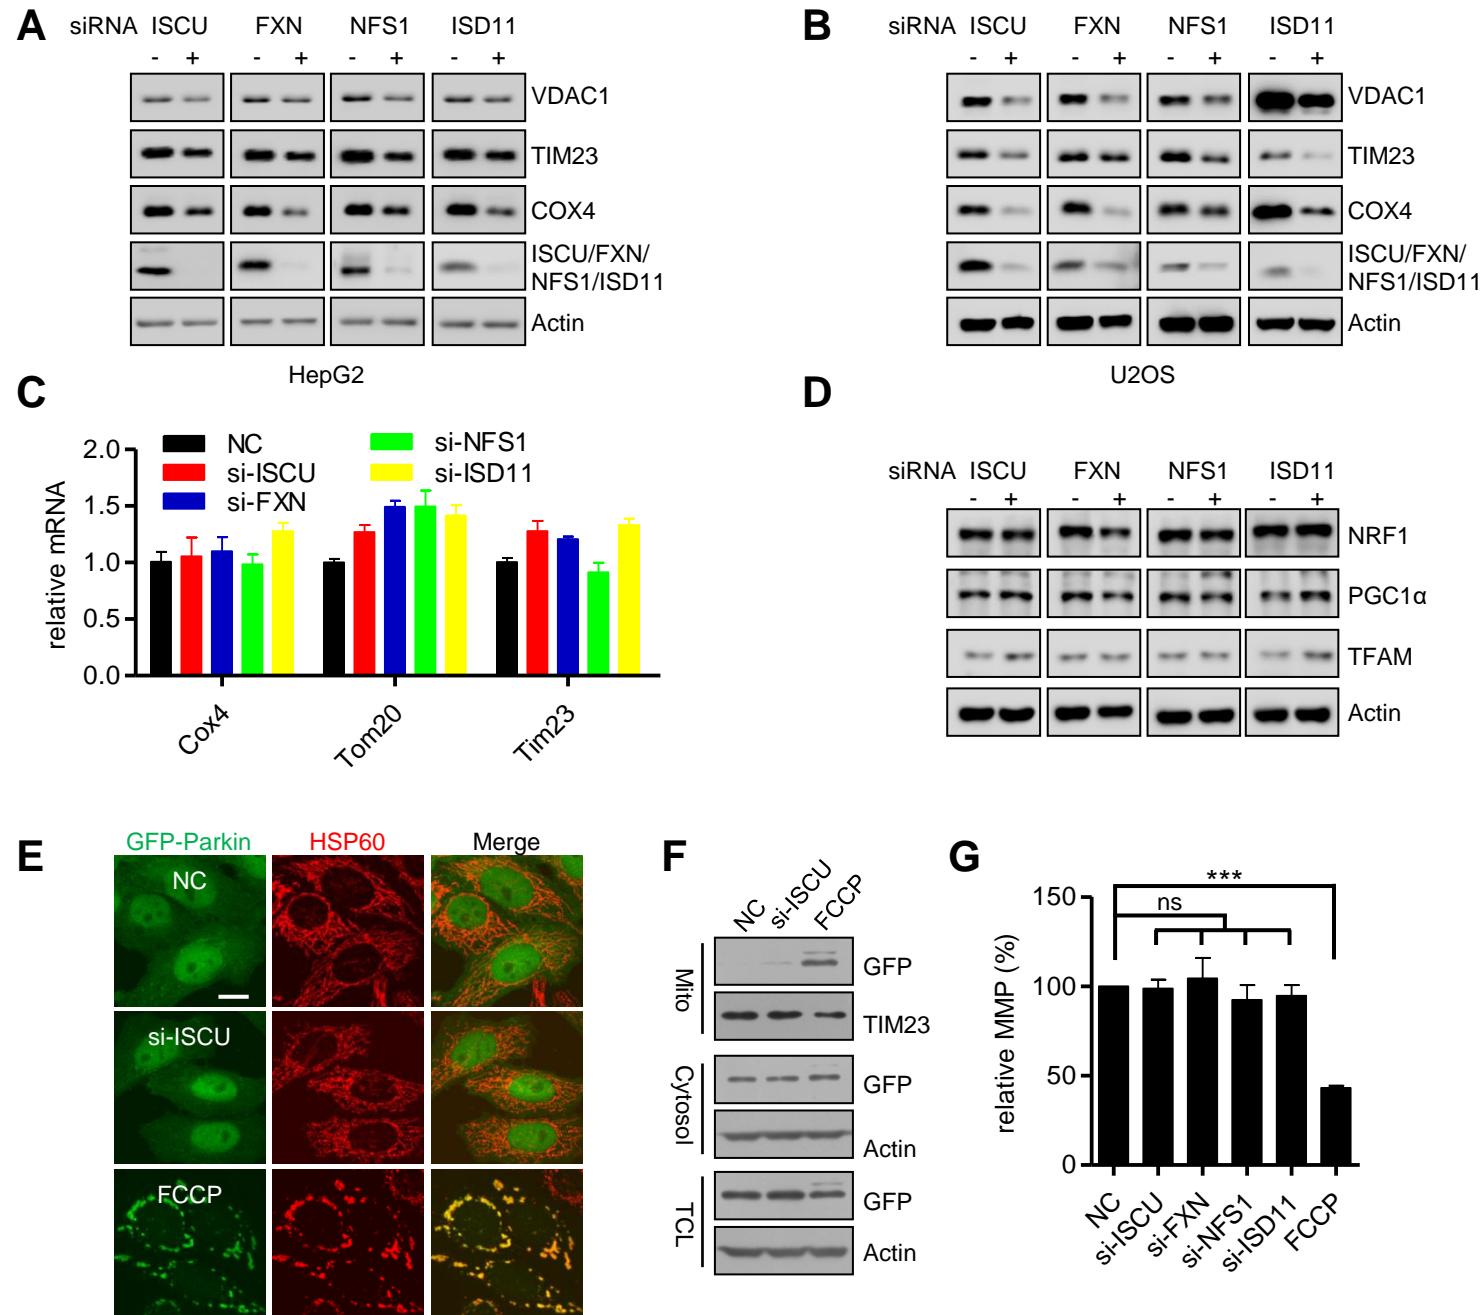

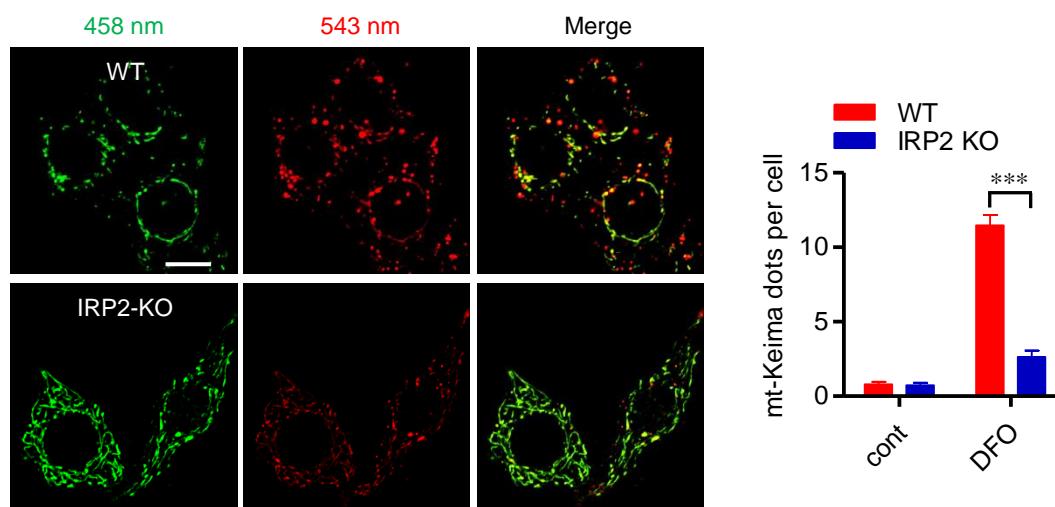

Fig. S2. IRP2 regulates mitophagy overlapping to IRP1

A

B

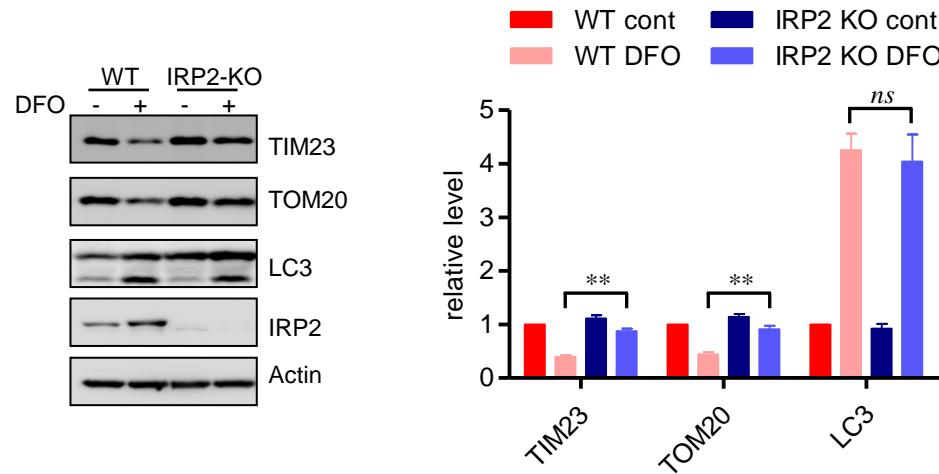

Fig. S3. The effect of IRP1 on general autophagy, Parkin mediated mitophagy and hypoxia induced mitophagy

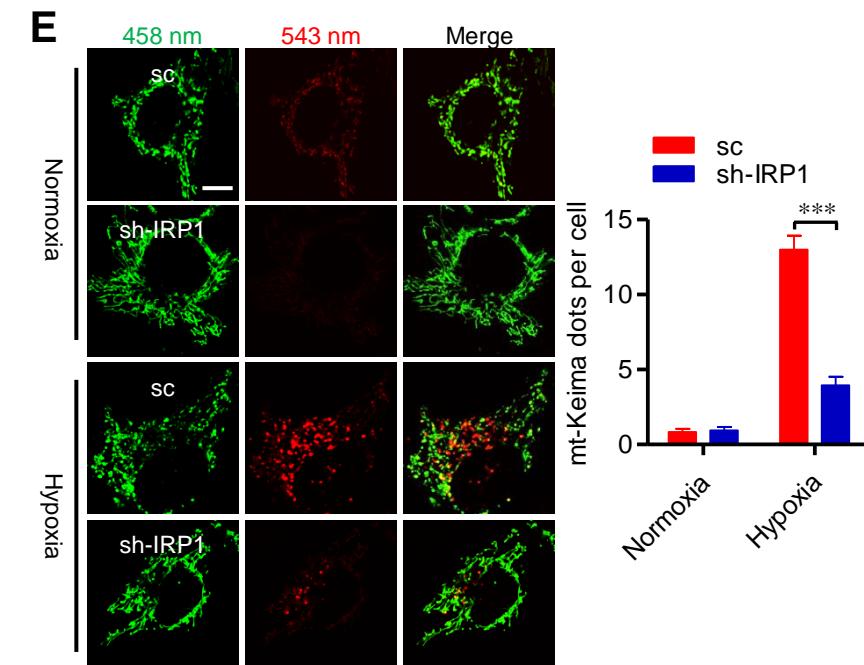

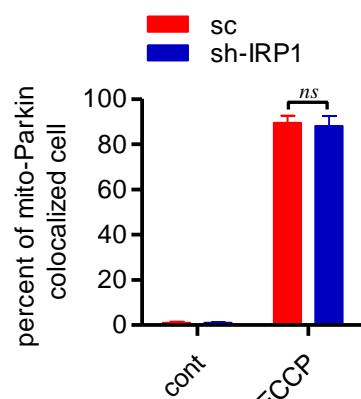

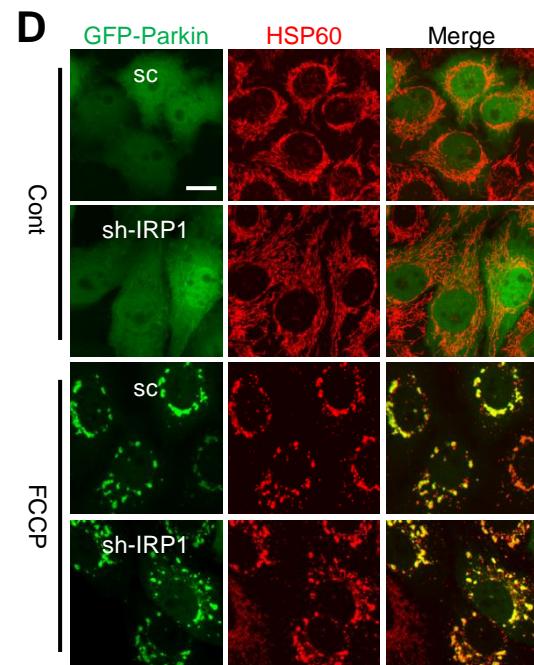

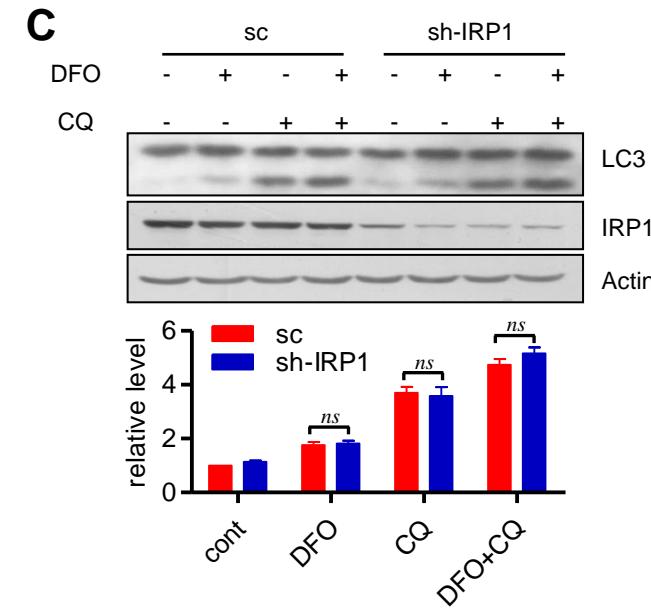

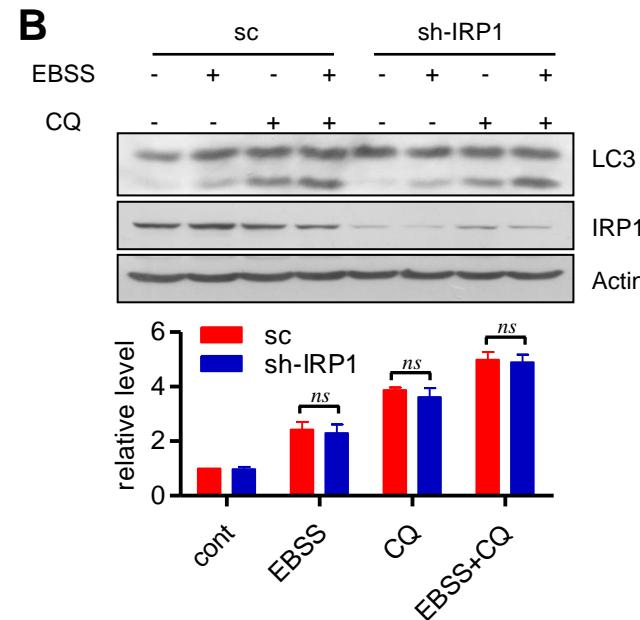

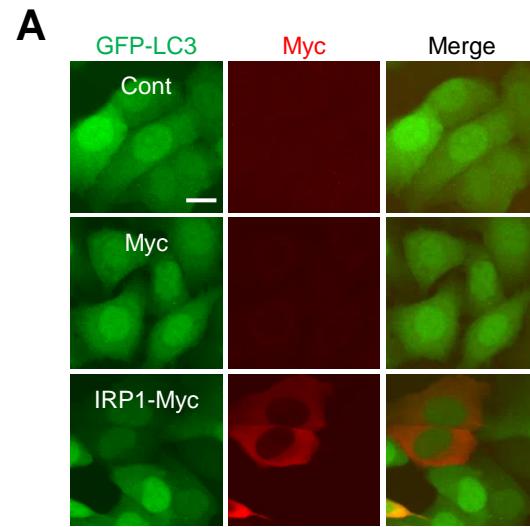

Fig. S4. IRP1 modulates Bcl-xL translation

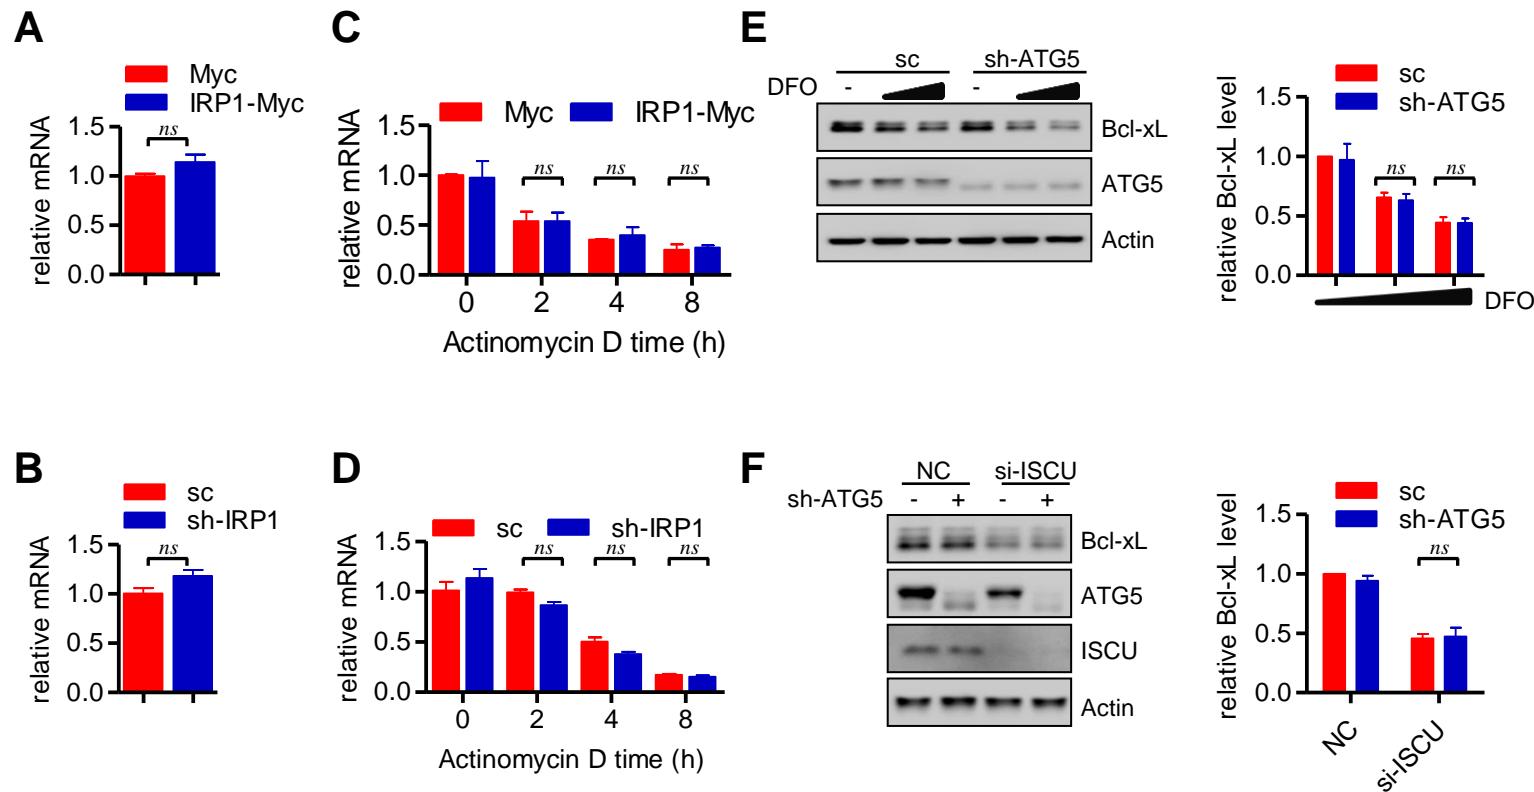

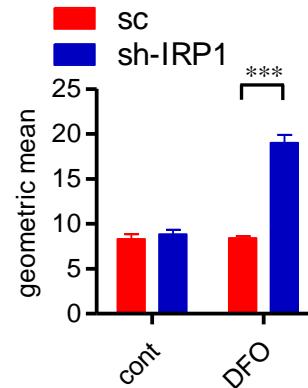

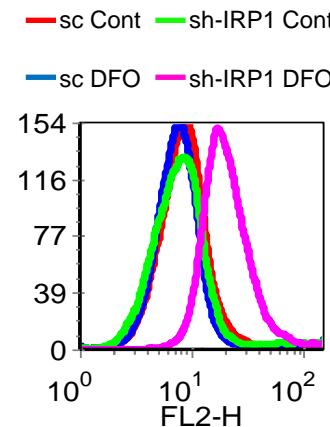

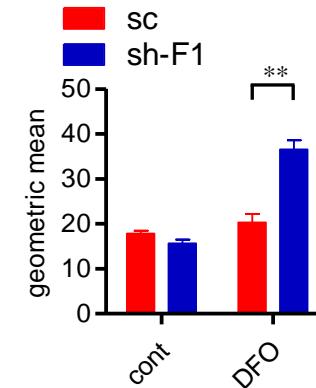

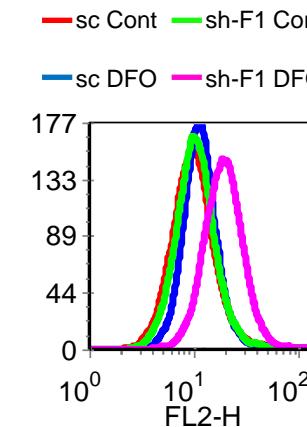

Fig. S5. FUNDC1 dependent mitophagy is crucial for mitochondrial quality control

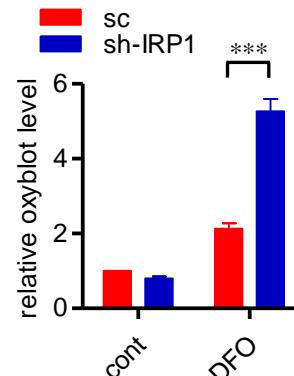

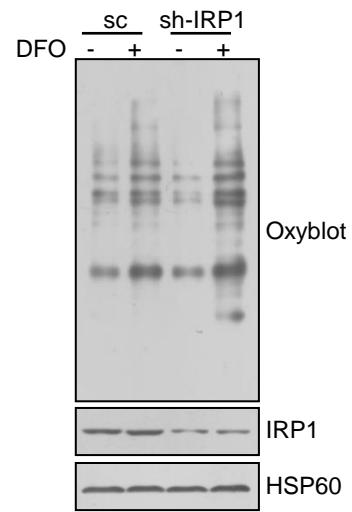

A

C

B

D
