

OPEN PEER REVIEW REPORT 2

Name of journal: Neural Regeneration Research

Manuscript NO: NRR-D-19-00671

Title: The role of vascularization in nerve regeneration

Reviewer's Name: Xin Zhao

Reviewer's country: China

Date sent for review: 2019-11-22

COMMENTS TO AUTHORS

1. Most papers reviewed are related to nerve graft. It is suggested to add "... of nerve graft" in the title.
2. Vascularization is much important in some situations, such as nerve graft in long length or large diameter. But up to now these situations are still not the appropriate indications for applying artificial nerve graft. What's the author's consideration on this point?
