## Supplemental Table 1 Studies on Associations of Multi-Parameter CoNiM to Clinical Parameters (Group A)

Summary table of Group A studies.

Study	n	Type of trial	Device	Vital Signs Measured (Derived Parameters)	Patient Group	Clinical Variable	Results	Reference
Kanaoka et al, 2012	25	Prospective data collection and retrospective analysis	TM-2425, A&D, Tokyo, Japan	BP, HR	Hospitalised hypertensive patients with CKD	Renal function - Urine Albumin Excretion Rate (UACR) and eGFR	UACR: 24-hour (p-value = 0.001), daytime (p-value = 0.009), and night-time (p-value < 0.001) ambulatory systolic BP, 24-hour (p-value = 0.007) and daytime (p-value = 0.016) HR variability. eGFR: 24-hour (p-value = 0.017) and night-time (p-value = 0.008) HR variability, and night-time HR (p-value = 0.038)	39
Zimlichman et al, 2012	113	Prospective data collection and retrospective analysis	Earlysense monitor	HR, RR	Medical ward (Patients with acute respiratory condition)	ICU transfer; intubation or mechanical ventilation; cardiac arrest in unit	ROC curve (combined HR & RR) - alerts: AUC = 0.75, p-value < 0.0001; trends: AUC = 0.93, p-value < 0.0026	40
Nowak et al, 2014	510	Prospective data collection and retrospective analysis, blinded	Nexfin	BP, HR (CO, CI, SV, SVI, SVR, SVRI)	ED patients suspected acute heart failure, sepsis, stroke	Acute Heart Failure, Sepsis or Stroke diagnosis; 30-Day mortality of each patient group <sup>o</sup>	SBP, DBP, Mean BP, HR, CO, CI, SVR, SVRI: all p-value < 0.0001; SVI: p-value = 0.0361; SV: p-value = 0.3737; 30-Day mortality SVI ROC curve: AHF: AUC=0.73, p-value < 0.01; sepsis: AUC=0.687, p-value < 0.01; stroke: AUC=0.741, p-value < 0.05	25
Hubner et al, 2015	226	Prospective data collection and retrospective analysis	IntelliVue Cableless Measurement Pods	RR, HR, SpO2, BP	Emergency department waiting room	Clinical symptom categories: dyspnoea, chest pain, hypertension, palpitation, collapse	SpO2: dyspnoea compared to chest pain p-value = 0.022; BP: hypertension compared to chest pain, palpitation and collapse all p-value < 0.001 while compared to dyspnoea p-value = 0.004; RR: dyspnoea compared to all other groups all p-value < 0.001; HR: palpitations compared to chest pain p-value < 0.001 and to collapse p-value = 0.024	38
Nowak et al, 2016	127	Prospective data collection and retrospective analysis, blinded	Nexfin	BP, HR (CI, SVRI)	ED patients with confirmed systemic infection	Three different clusters of sepsis patients; 30-Day mortality, LOS, of each patient group <sup>o</sup>	CI and SVRI: all p-value < 0.0001; 30-Day mortality: p-value = 0.0311; LOS: p-value = 0.5801	24

<sup>o</sup>In Nowak et al, 2014 and Nowak et al, 2016, clinical outcomes (i.e. 30-day mortality and hospital LOS) were only analysed within each patient cluster. Therefore they were excluded from Group B meta-analysis.

**Abbreviations** HR, heart rate; BP, blood pressure; RR, respiratory rate; SpO2, peripheral capillary oxygen saturation; CO, cardiac output; CI, cardiac index; SV, stroke volume; SVI, stroke volume index; SVR, systemic vascular resistance; SVRI, systemic vascular resistance index; CKD, chronic kidney disease; eGFR, estimated glomerular filtration rate; ICU, intensive care unit; ED, emergency department; LOS, length of stay.

## Supplemental Table 2 Studies on Clinical Outcome of Multi-Parameter CoNiM (Group B)

Summary table of Group B studies.

Study	Type of trial	Total n	Device	Vital Signs	Patient Group (n)	Control <sup>§</sup> (n)	In-hospital Mortality	Hospital LOS	ICU Transfer	RRT Activation	NOS	Reference
Sulter et al, 2003	Prospective, parallel-grouped, randomised cohort study	54	Marquette Eagle 4000	HR, BP, SpO <sub>2</sub> , Temperature	Stroke ward (27)	Concurrent (27)	✓	✓			8	42
Cavallini et al, 2003	Prospective, parallel-grouped, randomised cohort study	268	Unknown	HR, BP, RR, SpO <sub>2</sub> , Temperature	Stroke ward (134)	Concurrent (134)	✓	✓			8	43
Kisner et al, 2008	Retrospective cohort study	357	Auricall	HR, SpO <sub>2</sub>	Heart and vascular surgery ward postoperatively (119)	Pre-intervention phase (238)					7	47
Langhorne et al, 2010	Prospective, parallel-grouped, randomised cohort study	32	Welch Allyn	HR, BP, SpO <sub>2</sub> , Temperature	Stroke ward (16)	Concurrent (16)	✓				8	44
Brown et al, 2014	Prospective, parallel-grouped, randomised cohort study	7643	EarlySense system	HR, RR	Medical-surgical ward (2361)	Pre-intervention phase and concurrent <sup>†</sup> (5282)			✓	✓	9	45
Pearl et al, 2016	Prospective cohort study	231	Phillips MP5SC	Multiple vital signs*	General hospital wards (80)	Pre-intervention phase (151)	✓				8	46
Weller et al, 2017	Prospective cohort study	2937	Sotera VisiMobile	HR, BP, RR, SpO <sub>2</sub>	Neuro/Neuro-Surgical ward, general hospital wards (1069)	Pre-intervention phase and concurrent <sup>†</sup> (2887)	✓	✓	✓	✓	9	26
Downey et al, 2018	Prospective, parallel-grouped, cluster-randomised cohort study	350	Sensium Vitals	HR, RR, Temperature	Elective general surgery wards (140)	Concurrent (86)		✓			8	41
Verrillo et al, 2018	Prospective with retrospective review of control group, cohort study	849	Sotera VisiMobile	HR, BP, RR, SpO <sub>2</sub> , Temperature	Orthopedic and trauma general care ward (422)	Pre-intervention phase (427)	✓		✓	✓	8	48

\*Did not specify vital signs monitored.

<sup>§</sup>Concurrent implies same period but in a different ward while pre-intervention phase implies different period but in the same ward as intervention ward.

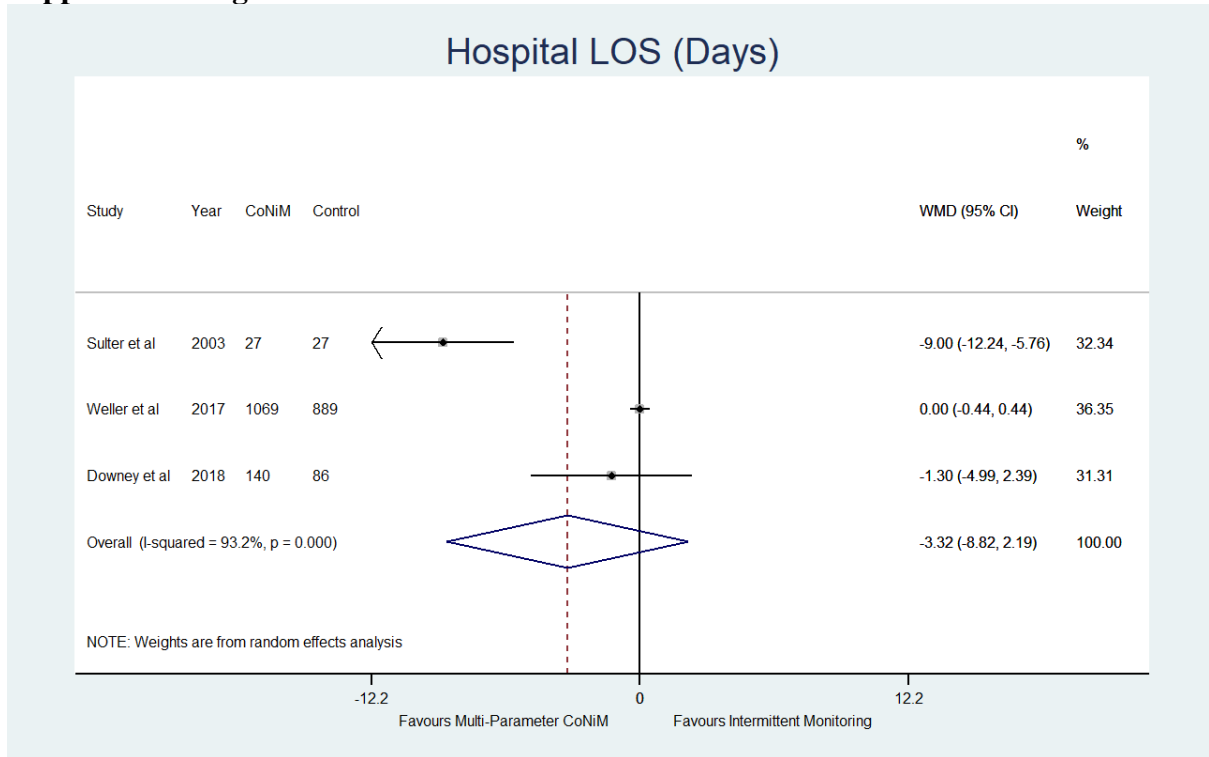

<sup>†</sup>Also includes a control group during pre-intervention phase but in the ward used by the concurrent control group; therefore in Brown et al, 2014, only 1535 control patients from the intervention ward but during pre-intervention phase were included in this meta-analysis; likewise only 889 control patients were included from Weller et al, 2017.

**Abbreviations** HR, heart rate; BP, blood pressure; RR, respiratory rate; SpO<sub>2</sub>, peripheral capillary oxygen saturation.

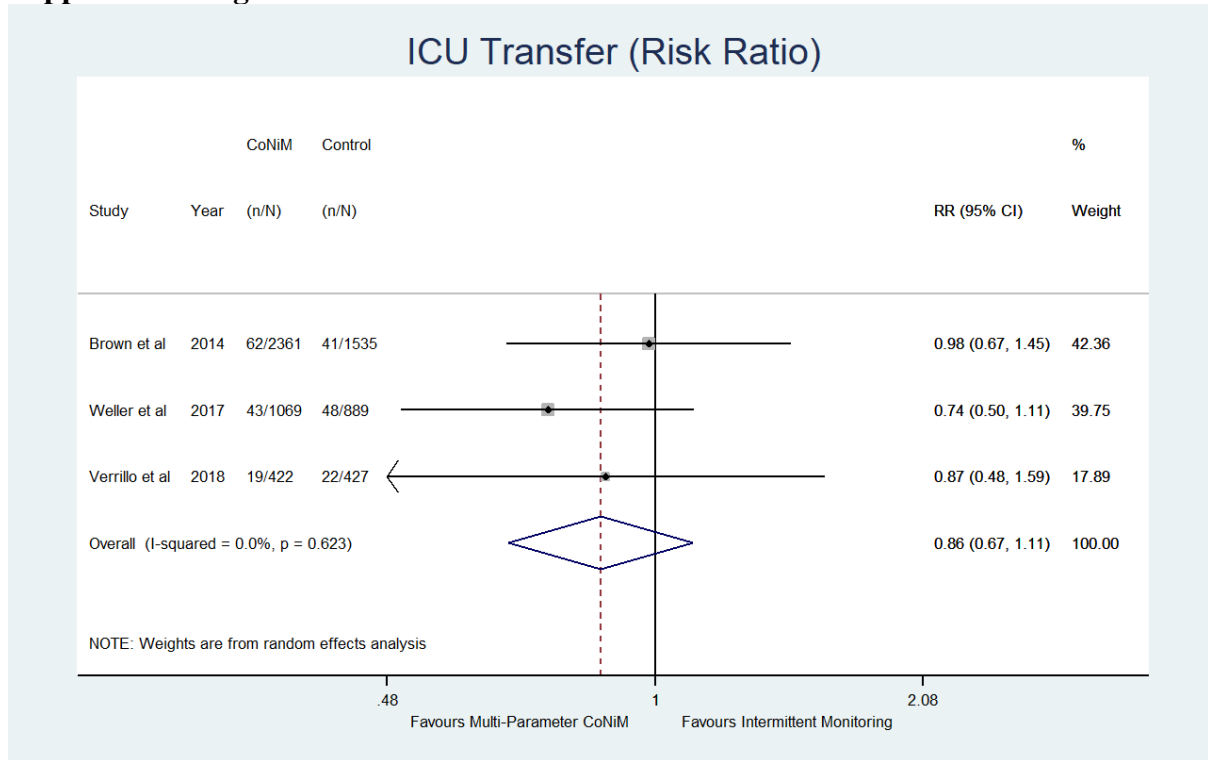

Supplemental Figure 2.2

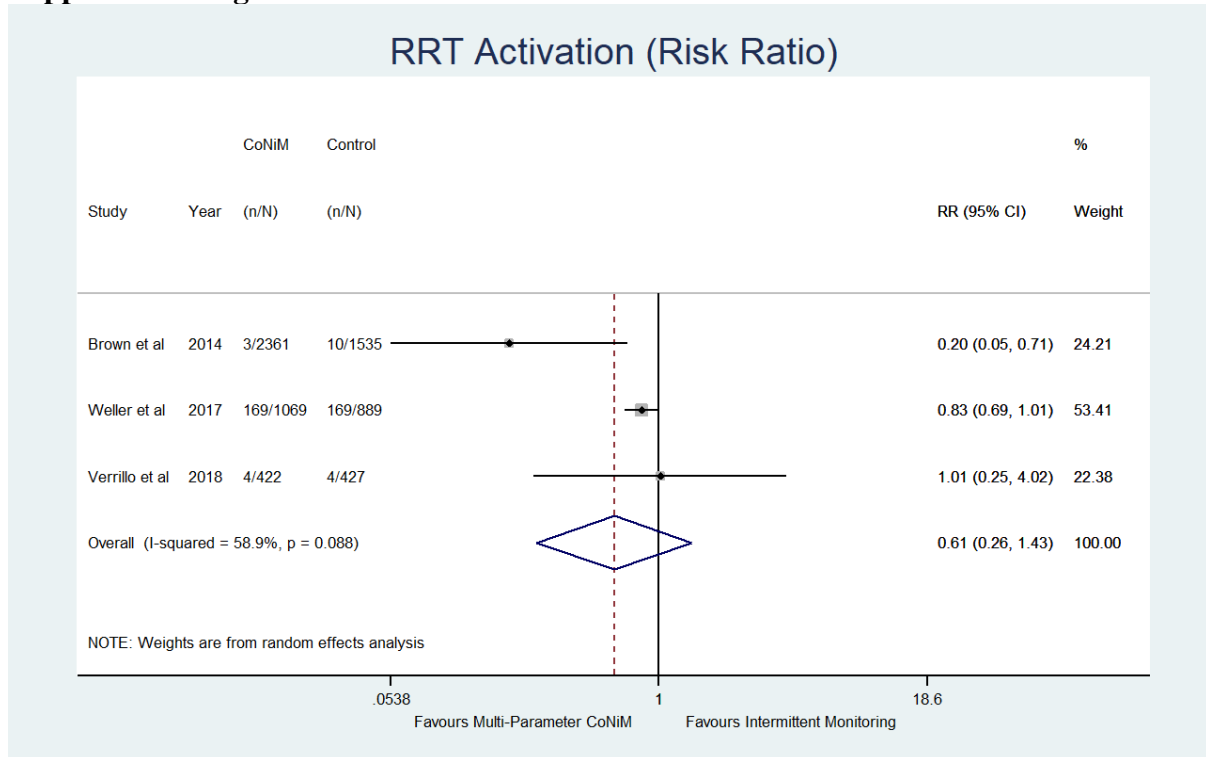

Forest plot of weighted mean difference (WMD) in hospital LOS.

**Supplemental Figure 2.3**

Forest plot of ICU transfer risk ratio. n, positive cases; N, sample size.

Supplemental Figure 2.4

Forest plot of RRT activation risk ratio. n, positive cases; N, sample size.
