

Table S2. Comparison of the Incidence and the Proportion of Visual Impairment in Retinopathy of Prematurity According to the Birth weight and Gestational Age Categories

	Total	By Birth weights			By Gestational Age*			Missing
		< 1500 g	1500–2499 g	≥ 2500 g	< 28 weeks	28–37 weeks	≥ 37 weeks	
No. of population	4,149,959	6,795	196,226	3,946,938	6,100	112,147	3,959,788	71,924
No. of ROP	8,273	2,155	4,993	1,125	1,982	5,187	61	1,043
ROP incidence [†]	1.99	317.14	25.45	0.29	324.92	46.25	0.02	14.50
No. of VI in ROP patients	138	68	51	19	54	62	0	22
VI proportion in ROP patients (%)	1.67	3.16	1.02	1.69	2.72	1.20	0.00	2.11

ROP = retinopathy of prematurity; VI = visual impairment.

*calculated by $\{280 - [\text{estimated date of delivery} - \text{actual delivery date (days)}]\} / 7$.

[†]Per 1000 newborns.
