

**Preventing and treating PTSD-like memory by trauma
contextualization**

Al Abed *et al.*

Supplementary Figure 1| Histology: Maximum and minimum areas of virus diffusion (black and red dashed lines, respectively) from the anterior dorsal CA1 (Bregma -1.34 mm) to the posterior dorsal CA1 (Bregma -2.7). The grey area represents the correct zone for optic fiber implantation. Infection or

implantation outside these marks was considered incorrect and mice were excluded from the study (From Franklin & Paxinos, 2001).
