

Supplementary Figure S1. PCoA plots based on unweighted UniFrac distance matrices. Each large circle represents an individual fecal donor. **(A)** samples presented by subject. Each sphere colour within the large circle represents an individual fecal donor sample at 0 and 24 h. **(B)** samples by treatment. Each large circle represents a subject and each sphere colour represents a treatment: orange: no treatment; blue: treated with minispheres with Cyclosporine A (CyA); green: treated with minispheres without CyA. **(C)** samples by time-point: red spheres, 0 hour; blue spheres, 24 hours.

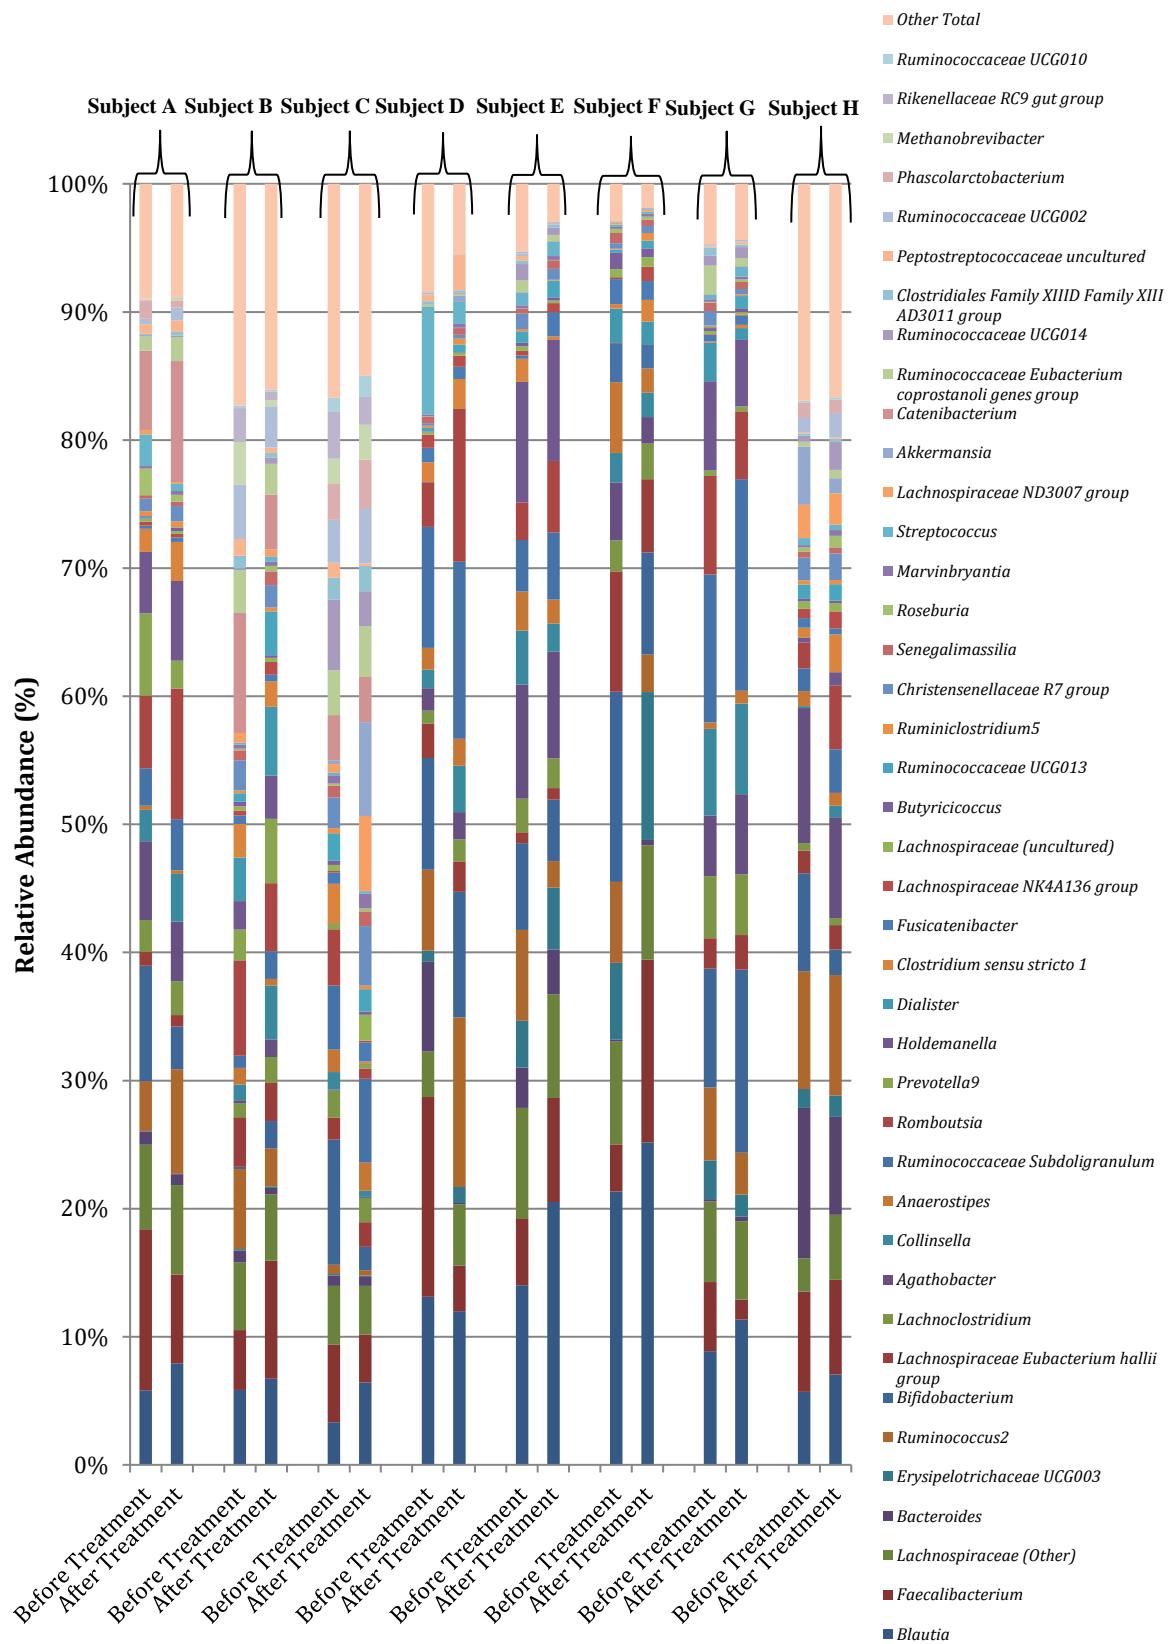

Supplementary Figure S2. Relative abundance (%) of the phyla across treatment groups in fecal samples from six subjects (1-6) following 24 hour fermentation in an *ex vivo* model. Groups: non-treatment control (NTC); Minispheres without (-) Cyclosporine A (CyA), Minispheres with (+) CyA.

Supplementary Figure S3. Relative abundance (%) of the bacterial genera identified in fecal samples in treatment groups from six individual subjects (Subjects 1-6) following 24h fermentation. Groups: non-treatment control; Minispheres without (-) Cyclosporine A (CyA); Minispheres with (+) CyA

Supplementary Figure S4. Relative abundance (%) of the bacterial phyla identified in fecal samples from human subjects (n=8) participating in the pilot study with SmPill® + CyA, before (Day 0) and after (Day 7) treatment.

Supplementary Figure S5. Relative abundance (%) of the bacterial genera identified in human fecal samples from eight subjects (A-H), before and after treatment with SmPill® + Cyclosporine A (CyA)

Supplementary Table S1

Alpha Diversity Indices (mean) for 6 fecal ferment samples across three treatment groups following 24 hour fermentation in an *ex vivo* model.

Index	No Minispheres	Minispheres with CyA	Minispheres without CyA	p value
Chao1 richness estimate	449.1	436.4	430.9	0.56
Simpson's Diversity Index	0.96	0.96	0.96	0.23
Shannon Index	5.8	5.9	5.8	0.38
Number of observed species	420.7	412.3	398.5	0.51

Supplementary Table S2. Concentration of SCFAs (mM) in fecal samples following 24 h fermentation in an *ex vivo* model.

SCFAs (mM)	nButyrate			iButyrate			Propionate			Acetate		
Treatment	MS* - CyA	MS + CyA	No MS	MS - CyA	MS + CyA	No MS	MS - CyA	MS + CyA	No MS	MS - CyA	MS + CyA	No MS
