

DATA ABSTRACTION SHEET

1) Identification: Age at admission (hours or days)_____ Sex of neonate_____

2) Gestational age (from LNMP or by Ballard score) _____

3) Birthweight (gram)_____ Weight for gestational age_____ Admission Temperature (0c) _____

4) Apgar score; 1st minute_____5th minute_____10th minute_____

5) Place of birth: FHS District hospital Health center Home

6) Type of pregnancy a) Singleton b) Twin c) Triplet

7) Maternal age _____ address _____ parity _____

8) Maternal medical problems

Preeclampsia/Eclampsia DM (Type1, 2 or gestational) Chronic hypertension

9) ANC a) yes b) NO

10) Antenatal steroid a) given b) Not given

11) Preterm PROM a) Yes b) No

12) Mode of delivery: SVD C/S Forceps Vacuum

13) Main neonatal medical problem: RDS Sepsis Hypoglycemia Meningitis IVH
Anemia Hyperbilirubinemia other (specify) _____

14) Treatment i) Antibiotics used during hospital stay a) Ampicillin b) Gentamycin c) ceftriaxone
d) vancomycine e) ceftazidim f) ciprofloxacin g) Metronidazole

ii) If antibiotics given, duration of all antibiotics (in days) _____

iii) Feeding during hospital stay a) Trophic feeding b) full calorie feeding from the beginning c) maintenance fluid only

15) Outcome of preterm neonate: Discharged improved Died Went against medical advice/ disappeared

16) Age at; discharge _____ death _____ Went against medical advice/ disappeared _____

17) Cause of death: RDS NEC Uncontrolled sepsis Apnea of prematurity
Uncontrolled HAI pulmonary hemorrhage other(specify) _____
