

Supplementary figures:

**Supplementary Figure 1. Severity of dyspnea and impairment of physical activity (NYHA I-IV) in uILD cohort at baseline.** The data are presented as percentage of all uILD patients. Abbreviations: NYHA- New York Heart Association.

**Supplementary Figure 2. Underlying reasons for the diagnosis of uILD.** Data are presented as percentage of all uILD patients.

**Supplementary Figure 3. Cumulative survival and smoking status (p=0.008)**

**Supplementary Figure 4. Cumulative survival and DLCO % pred. at baseline (p<0.0001).**

Abbreviations: DLCO- diffusing capacity of the lung for carbon monoxide.

**Supplementary Figure 5. Cumulative survival and 6MWD at baseline ( $p < 0.0001$ ).** Abbreviations: 6MWD- six minutes walking distance, m-meters.

**Supplementary Figure 6. Impact of prednisolone on survival in uILD ( $p = 0.094$ ).**

**Supplementary Figure 7. Impact of UIP pattern in High-resolution CT (Fleischner Society Criteria) on survival in uILD (p=0.604).** Abbreviations: UIP- usual interstitial pneumonia, CT- Computed Tomography, IPF- idiopathic pulmonary fibrosis.
