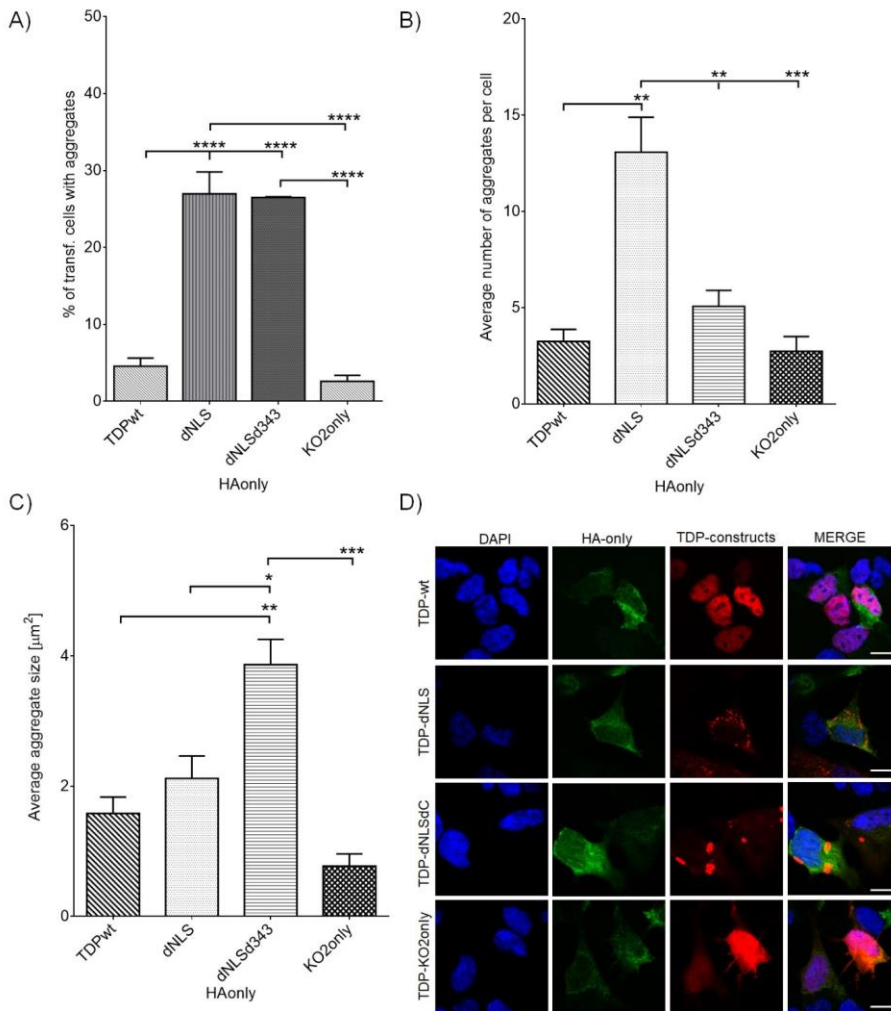

Figure S1: TDP-43 constructs co-transfected with plasmid HAonly. **(A)** Quantification of co-transfected cells harboring aggregates. TDPwt ($4.6 \pm 1.05\%$), dNLS ($27.0 \pm 1.64\%$), dNLSd343 ($26.5 \pm 0.05\%$), and KO2only ($2.6 \pm 0.45\%$). **(B)** Average number of aggregates in individual cells. TDPwt (3.2 ± 0.63), dNLS (13.1 ± 1.82), dNLSd343 (5.1 ± 0.83), and KO2only (2.7 ± 0.77). **(C)** Average aggregate size. TDPwt ($1.6 \pm 0.25 \mu\text{m}^2$), dNLS ($2.1 \pm 0.34 \mu\text{m}^2$), dNLSd343 ($3.9 \pm 0.39 \mu\text{m}^2$), and KO2only ($0.77 \pm 0.19 \mu\text{m}^2$). **(D)** SH-SY5Y cells co-transfected with mKO2-TDP-43 constructs and HAonly plasmid. Probed for HA-tag and counterstained with DAPI. Scale bars: 10 μm . All experiments were performed in duplicates and repeated three times. Data are presented as mean \pm s.e.m. * $P < 0.05$, ** $P < 0.01$, *** $P < 0.001$, **** $P < 0.0001$; One-way ANOVA, Tukey post-hoc test.

Figure S2: Western blots of total lysates of SH-SY5Y cells co-transfected with KO2-TDP-43 constructs and HA-tagged wild-type and mutant ALS-associated genes. **(A)** Co-transfection of wt or mut HA-tagged hnRNPA1 and TDPwt, dNLS, dNLSd343, or KO2only. **(B)** Co-transfection of wt or mut HA-tagged MATR3 and TDPwt, dNLS, dNLSd343, or KO2only. **(C)** Co-transfection of wt or mut HA-tagged VCP and TDPwt, dNLS, dNLSd343, or KO2only. **(D)** Co-transfection of wt or mut HA-tagged UBQLN2 and TDPwt, dNLS, dNLSd343, or KO2only. Plasmid containing only 3xHAtag was co-transfected with KO2-TDP-43 constructs as a baseline control. GAPDH was detected as a loading control.

Formatted: Not Highlight

Figure S3: Solubility of TDPdNLS and TDPdNLSd343 constructs co-transfected in SH-SY5Y cells with HA-tagged wild-type and mutant ALS-associated genes. **(A)** RIPA soluble and UREA soluble fractions of SH-SY5Y cells co-transfected with wt or mut HA-tagged hnRNPA1 and TDPdNLS or dNLSd343. **(B)** RIPA soluble and UREA soluble fractions of SH-SY5Y cells co-transfected with wt or mut HA-tagged MATR3 and TDPdNLS or dNLSd343. **(C)** RIPA soluble and UREA soluble fractions of SH-SY5Y cells co-transfected with wt or mut HA-tagged VCP and TDPdNLS or dNLSd343. **(D)** RIPA soluble and UREA soluble fractions of SH-SY5Y cells co-transfected with wt or mut HA-tagged UBQLN2 and TDPdNLS or dNLSd343. **(E)** RIPA soluble and UREA soluble fractions of SH-SY5Y cells co-transfected with plasmid containing only 3xHATag and TDPdNLS or dNLSd343.
