

Supplemental Figure 1. Intra and inter observer variability of lead thickness measurement. The limits of agreement are narrow for both the intra and inter-observer graph (within 1 mm) yielding a coefficient of repeatability from duplicate measurement at 0.74 mm and 0.77 mm respectively.

VIDEO LEGENDS.

Video 1. Linked to Figure 1. See Figure 1 for explanation.

Video 2. Linked to Figure 3. See Figure 3 for explanation.

Video 3. Linked to Figure 5. See Figure 5 for explanation.
