

## Supplementary Material

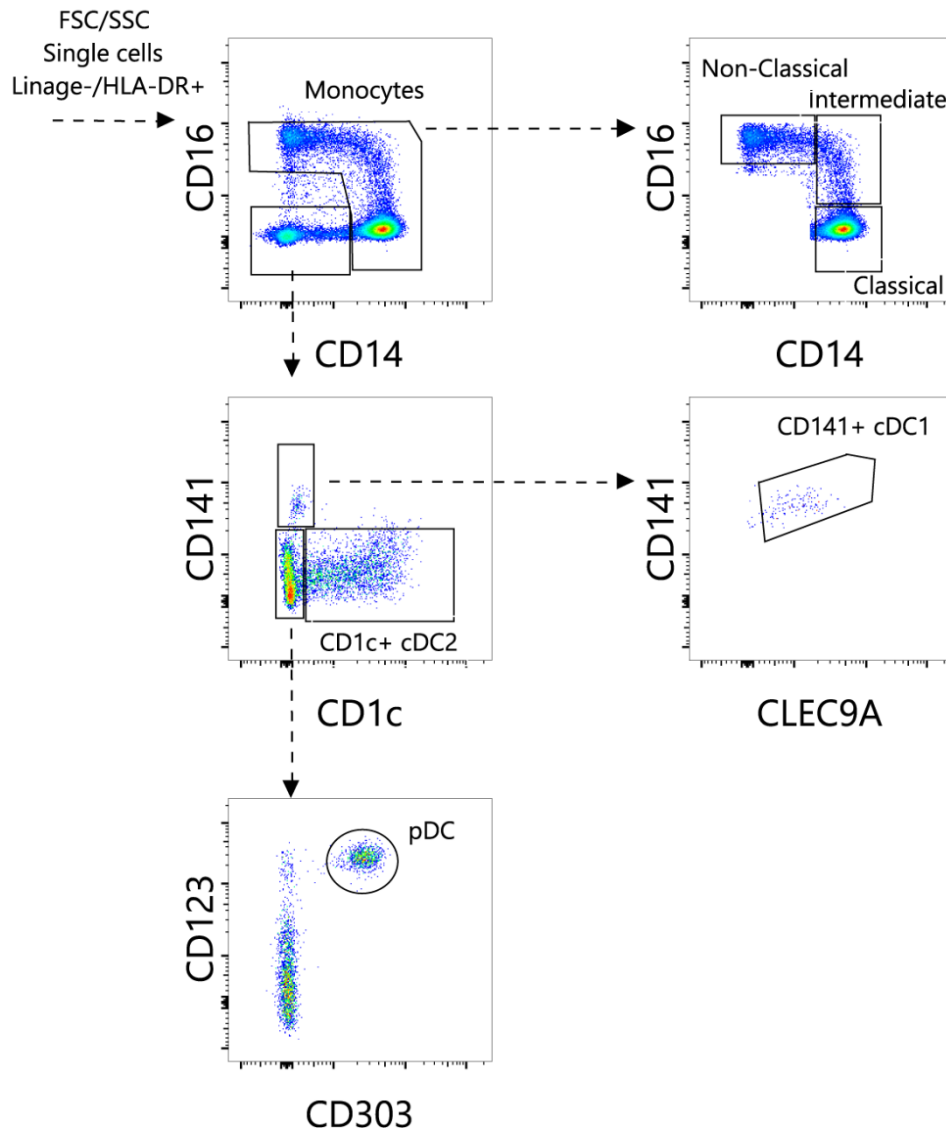

### 1 Supplementary Figures and Tables

#### 1.1 Supplementary Figures

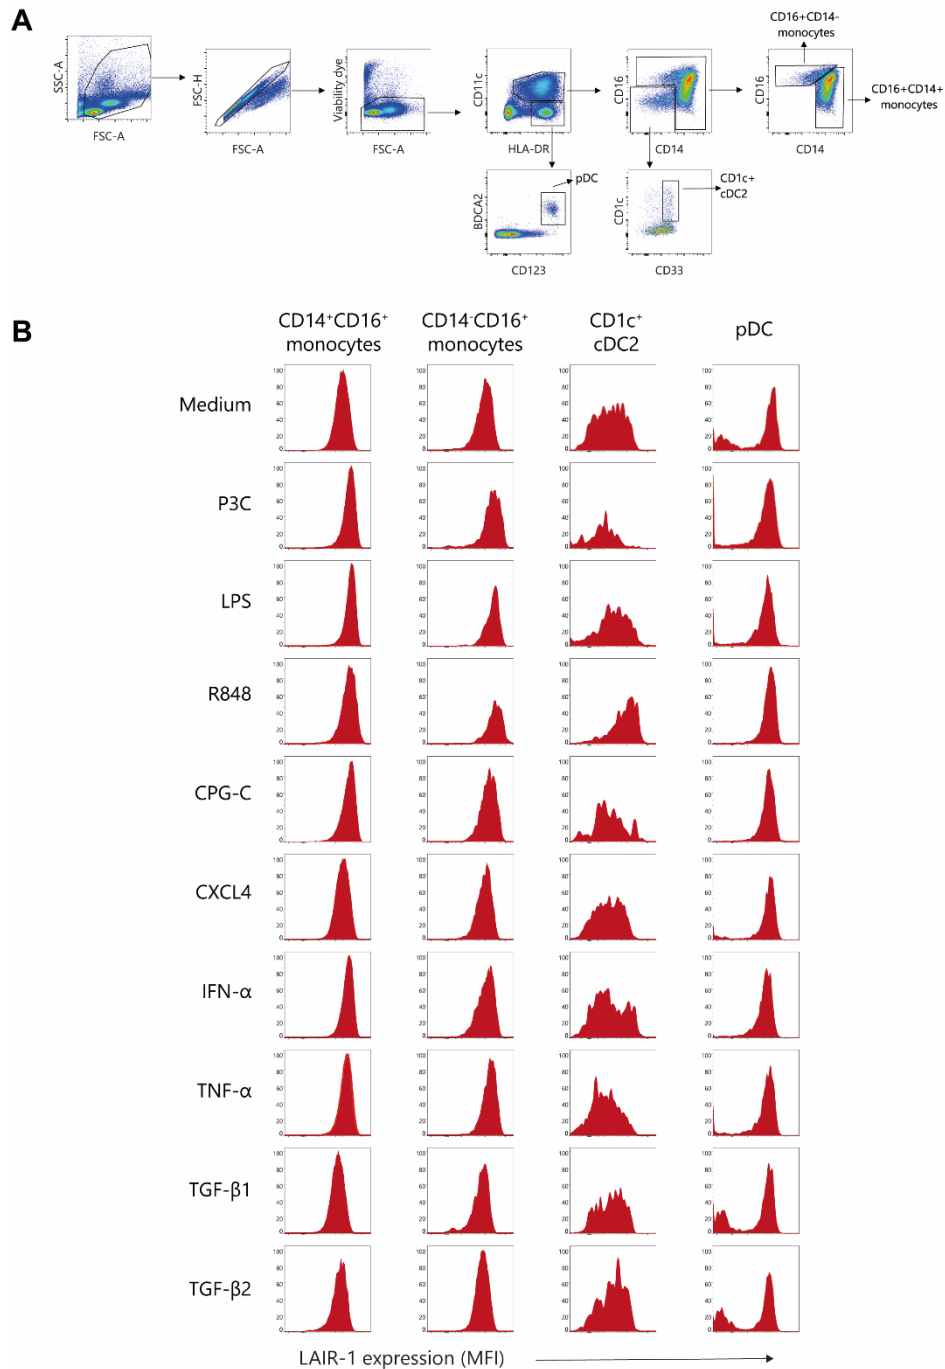

**Supplementary Figure 1.** Analysis strategy and phenotype of monocyte-derived macrophages and dendritic cells.

Flow cytometry gating strategy analysis of the different types of *in vitro* monocyte-derived macrophages and dendritic cells and representative dot plots for the expression of CD14, CD11c, CD163, CD64, CD1a and CD80, used to assess differentiation.

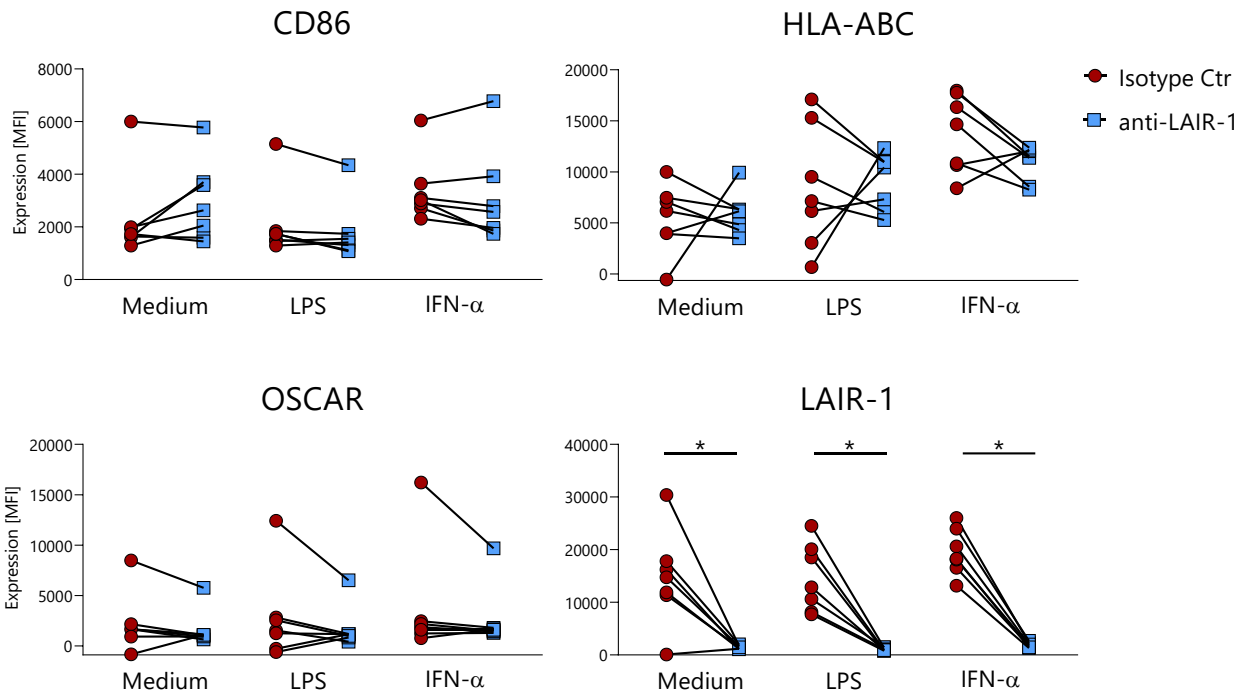

**Supplementary Figure 2.** Analysis strategy to identify classical, intermediate and non-classical monocytes as well as CD1c<sup>+</sup>cDC1s, CD141<sup>+</sup>cDC2s and pDCs.

Flow cytometry gating strategy analysis to identify classical, intermediate and non-classical monocytes as well as CD1c<sup>+</sup>cDC1s, CD141<sup>+</sup>cDC2s and pDCs on peripheral blood mononuclear cells (PBMC).

**Supplementary Figure 3.** Analysis strategy to determine LAIR-1 expression on stimulated PBMCs.

**(A)** Flow cytometry gating strategy analysis to identify CD14<sup>+</sup>CD16<sup>+</sup> and CD14<sup>-</sup>CD16<sup>+</sup> monocytes subpopulations as well as CD1c<sup>+</sup> cDC2 and pDC on PBMCs stimulated with different TLR agonists, cytokines and chemokines. **(B)** Representative histogram of LAIR-1 expression on stimulated CD14<sup>+</sup>CD16<sup>+</sup> and CD14<sup>-</sup>CD16<sup>+</sup> monocytes, as well as on CD1c<sup>+</sup> cDC2 and pDC.

**Supplementary Figure 4.** CD86, HLA-ABC, OSCAR and LAIR-1 expression on monocytes upon LAIR-1 triggering.

Peripheral blood mononuclear cells were pre-treated with anti-LAIR-1 agonist (Dx26) or isotype control (2 h) and stimulated overnight with TLR4 agonist- LPS or IFN $\alpha$  and the expression of CD86, HLA-ABC, Osteoclast-associated immunoglobulin-like receptor (OSCAR) and LAIR-1 was determined on gated monocytes, using flow cytometry. Results are represented as paired samples. Statistically significant differences were considered when \* $p < 0.05$  (Wilcoxon's test).

## 1.2 Supplementary tables

**Supplementary Table 1:** Antibody panels used on the flow cytometry stainings.

### LAIR-1 expression on freshly isolated PBMCs (Fig. 1A-B)

Target	Label	Manufacturer	Catalogue nr.	Clone
CD3	AF700	Biolegend	300424	UCHT1
