## Supporting Information

**Table S1.** List of p180 analytes, ratios and sums.

**Table S2.** List of significant metabolites comparing 0 w/2 w to 6 w/sham. Significance was calculated by t-test using a FDR of < 5%. The mean values are reported in pmol/mg of tissue. SD=standard deviation, SEM=standard error of the mean, N=number of individual samples

**Table S3.** List of significant metabolites comparing 6 w to sham. Significance was calculated by t-test using a FDR of < 5%. The mean values are reported in pmol/mg of tissue. SD=standard deviation, SEM=standard error of the mean, N=number of individual samples

**Figure S1.** Histopathologic damage among BIO 300 treated and untreated male C57L/J mice surviving to day 180 post 12.5 Gy WTLI. Paraffin embedded left lung samples were sectioned at 5 micron thickness and stained with Masson's Trichrome. The lungs of sham-irradiated animals, age matched to the irradiated animals, display normal alveolar architecture with evidence of focal bronchial epithelial hyperplasia in some instances at 180 days. (a). Diffuse inflammation can be observed throughout the untreated, irradiated lung (b) with airway consolidation particularly around the subpleura. High magnification (10x) of the damaged area demonstrates alveolitis with collagen deposition and airway collapse (b.1). Inflammation is characterized by an abundance of foamy macrophages and mononuclear cell lymphocytes (b.2). Bronchial epithelial hyperplasia is also observed (b.2). Parts of the lung were less damaged (b.3) but contained inflammatory cells and displayed interstitial edema with mild to moderately increased alveolar wall thickness. The lungs of male C57L/J mice treated with 2 or 6 weeks of BIO 300 starting 24 hours post exposure

to 12.5 Gy WTLI displayed less damage than the untreated controls. However, 2 weeks of administration was inferior to 6 weeks (c, d). Airway congestion with proteinaceous exudate and mononuclear cell, foamy macrophages, and bronchial epithelial hyperplasia (c.1) along with interstitial inflammation (c.2.) and airway consolidation with fibrous deposition (c.3) were observed in the lungs of animals treated for 2 weeks post-exposure, similar to that of the untreated controls. In contrast, the lungs from surviving animals treated with BIO 300 for 6 weeks displayed less overall damage (D) with focal areas of injury (d.1), but with large volumes of normal, well aerated lung (d.2, d.3). Panels of local damage were taken at 10x magnification.

**Figure S2.** Multivariate analysis of the four individual cohorts: 0 w, 2 w, 6 w, and sham. A.) PCA plot comparing 0 w (red), 2 w (green), 6 w (purple), and sham (blue). The 95% confidence interval is indicated by the elliptical pattern per group. B.) PLS-DA plot comparing 0 w (red), 2 w (green), 6 w (purple), and sham (blue). The 95% confidence interval is indicated by the elliptical pattern per group. Analysis was performed using MetaboAnalyst 3.0.

**Figure S3.** Correlation analysis using a dendrogram to compare 0 w (red), 2 w (green), 6 w (purple), and sham (blue). The dendrogram correlation analysis was done using Pearson distance measurement and Ward clustering via MetaboAnalyst 3.0.

	<b>p180 Abbreviation</b>	<b>Description</b>
189	(C2+C3) / C0	Ratio of short chain acylcarnitines to free carnitine
190	AAA	Sum of the aromatic amino acids
191	ADMA / Arg*	Fraction of asymmetrically dimethylated Arginine of the unmodified Arginine pool
192	BCAA	Sum of branched chain amino acids
193	C2 / C0	Ratio of acetylcarnitine to free carnitine
194	Cit / Arg	Ratio of Citrulline to Arginine
195	Cit / Orn	Ratio of Citrulline to Ornithine
196	CPT-I ratio	Ratio of long chain acylcarnitines to free carnitine ([C16+C18]/C0)
197	Essential AA	Sum of essential amino acids
198	Fisher ratio	Ratio of branched chain amino acids/aromatic amino acids
199	Glucogenic AA	Sum of selected glucogenic amino acids (Alanine, Glycine, Serine)
200	Kynurenine / Trp	Ratio of Kynurenine to Tryptophan
201	Met-SO / Met	Fraction of sulfoxidized Methionine of unmodified Methionine pool
202	MUFA (PC)	Mono-unsaturated glycerophosphocholines
203	MUFA (PC) / SFA (PC)	Ratio of mono-unsaturated to saturated glycerophosphocholines
204	Non essential AA	Sum of the non-essential amino acids
205	Orn / Arg	Ratio of Ornithine to Arginine
206	PUFA (PC)	Sum of poly-unsaturated glycerophosphocholines
207	PUFA (PC) / MUFA (PC)	Ratio of poly-unsaturated to mono-unsaturated glycerophosphocholines

208	PUFA (PC) / SFA (PC)	Ratio of poly-unsaturated to saturated glycerophosphocholines
209	Putrescine / Orn*	Ratio of Putrescine to Ornithine
210	SDMA / Arg*	Fraction of symmetrically dimethylated Arginine of the unmodified Arginine pool
211	Serotonin / Trp	Ratio of Serotonin to Tryptophan
212	SFA (PC)	Sum of saturated glycerophosphocholines
213	Spermidine / Putrescine*	Ratio of Spermidine to Putrescine
214	Spermine / Spermidine	Ratio of Spermine to Spermidine
215	Total (PC+SM)	Sum of choline containing phospholipids
216	Total AA	Sum of all amino acids
217	Total AC / C0	Ratio of esterified to free carnitine
218	Total AC-DC / Total AC	Fraction of dicarboxyacylcarnitines of the total acylcarnitines
219	Total AC-OH / Total AC	Fraction hydroxylated acylcarnitines of the total acylcarnitines
220	Total DMA / Arg*	Fraction of dimethylated Arginine of the unmodified Arginine pool
221	Total lysoPC	Sum of lysoglycerophosphocholines
222	Total lysoPC / Total PC	Ratio of lysoglycerophosphocholines to glycerophosphocholines
223	Total PC	Sum of glycerophosphocholines
224	Total PC aa	Sum of diacyl-glycerophosphocholines
225	Total PC ae	Sum of glycerophosphocholine plasmalogens
226	Total SM	Sum of ceramide phosphocholines (sphingomyelins)
227	Total SM / Total (SM+PC)	Fraction of ceramide phosphocholines (sphingomyelins) of total phospholipid pool
228	Total SM / Total PC	Ratio of total ceramide phosphocholines (sphingomyelins) to total glycerophosphocholines
229	Total SM-non OH	Sum of non-hydroxylated ceramide phosphocholines (sphingomyelins)
230	Total SM-OH	Sum of hydroxylated ceramide phosphocholines (sphingomyelins)
231	Total SM-OH / Total SM-non OH	Ratio of hydroxylated to non-hydroxylated ceramide phosphocholines (sphingomyelins)
232	Tyr / Phe	Ratio of Tyrosine to Phenylalanine
