

Supplemental Table 2. MRI PIRADS association with Gleason upgrading. Results are shown by dichotomous PIRADS (1-3 vs 4-5) and GG in a 2x2 table. The NPV and PPV were 82% (95% CI: 77-88%) and 37% (95% CI: 31-44%) respectively, while the FPR and TPR were 43% (95% CI: 38-49%) and 68% (95% CI: 58-77%) respectively.

	No Gleason pattern 4	Gleason pattern ≥ 4	Total
MRI PIRADS 1-3	163	35	198
MRI PIRADS 4-5	124	73	197
Total	287	108	395
