

Supplemental Figure 2. Distribution of estimated anidulafungin $AUC_{0-24,ss}$ stratified by body weight

The boxes represent the inter-quartile range (from lower 25% to upper 75%) and the bold lines represent the median. Whiskers represent data within 1.5 times the inter-quartile range, and outliers are represented by dots outside of the whiskers.

$AUC_{0-24,ss}$, area under the curve over a 24-h dosing interval at steady state (maintenance dose).
