

Figure S7

Figure S7. Floral phenotypes of *N. benthamiana* plants infected with TRV carrying phyllogens. Floral phenotypes of *N. benthamiana* plants infected with TRV vector carrying phyllogens belonging to either phyl-A (PHYL1_{OY}) or phyl-B (PHYL1_{MD}, PHYL1_{PWB}, and PHYL1_{SY}) group. Phyllogens belonging to phyl-B (PHYL1_{MD}, PHYL1_{PWB}, and PHYL1_{SY}) induced no flower malformation.
